

The Earth is suffering

The Earth is suffering and wants to help!

- The earth is suffering and wants to help men recognize that it is necessary to change their way of thinking!
- They do not change their way of thinking!
- For this the earth is urged to do something!
- The earth is doing something and will teach men what they cannot see!
- Men will see that there is no alternative left for them!
- They must change!

Men must change!

- Men do not realize that now it is necessary to change!
- It is necessary and now they must do something!
- They must stop poisoning themselves!
- They must stop poisoning themselves, stop doing harm to themselves!
- It is their turn now to do something!
- There are men doing something!
- They are there but there must be more!

There must be more men!

- There must be more men willing to change!
- There must be more and do what they want to do!
- They must do what they want to do and they should let nobody stop them!
- They must do what they want to do and defend their cause!
- They defend their cause and are hindered!
- They are hindered to do what they want to do!
- That must be ended now!

The end is necessary!

- The end of thinking in categories which is prevailing must be heralded!
- Men must see that they have to do something!
- They must support those supporting them!
- They must support those people who are supporting them!
- This is necessary and important now!
- This is important now as otherwise nothing moves forward!

Something moves forward!

- Something will move forward if men stick together!
- They do not stick together! That is why nothing changes!
- Nothing changes, nothing that could change if men stuck together!
- They are not willing to stick together!
- Why?
- Because they think that they will not be affected!
- What does this mean?
- They believe that they will not be affected when the Earth defends itself!

They will be affected!

- They will be affected and they will be surprised how much they will be affected!
- The earth can and will defend itself!
- Men see that and get closer together!
- They will get closer together but they will have to get even closer!
- Why?
- Because they can only achieve something by getting closer together!

The effect is:

- The effect is: “Men get together and care for a change!”
- That is the goal!
- Something must change!
- The way of thinking must change! They must stop covering over themselves and the earth with garbage they produce!
- Now man is facing the decision to change his behaviour!
- He will have to change or else he will get a huge problem!

He has got a problem!

- He has got the problem that he still does not recognize!
- He has got the problem that he must see, that time has come to act!
- He must act!
- He cannot wait anymore because otherwise he will not be able to do what he wants to do!
- What does he want?
- He wants to live!
