

The Earth Is There!

The Earth is there means:

- “It is there!”
- It is there to help man what there is to do!
- What is there to do?
- There is much to do!
- There is much to do and **WHATEVER** man does is good!
- That is what man cannot understand!
- That is what man cannot comprehend!

Man cannot comprehend

- That it is good to be!
- Man is there and he can do EVERYTHING!
- Man is there and he can do EVERYTHING as he is EVERYTHING!
- He is EVERYTHING and he can do EVERYTHING!
- That is what man cannot comprehend!
- Why? Because he is thinking!

He is thinking!

- He is thinking and does what he believes is his duty!
- That is his problem!
- He does, what he believes is his duty!
- He does, what he believes is his duty and does it even though he does not want to do it!
- He does EVERYTHING he does not want to do!
- He does EVERYTHING he does not want to do and destroys the earth!

He destroys the Earth and himself!

- He destroys the Earth and himself, means: “He deprives himself of his livelihood!”
- He deprives himself of his livelihood, means: “He stops doing what he wants to do. To live!”
- He stops living, means: “He stops devoting himself to life!”
- He stops devoting himself to life and stops being happy!
- He stops being happy and he stops being happy about being alive!

He stops living!

- He stops living because of not doing what he wants most – to live!
- He does not live! He does not live and he does not realize that he does not live!
- He does not live and does not realize that he has got a problem!
- He has got the problem that he does not live the way he could!
- He could live differently and he could live the way he wants!

He could live the way he wants, means:

- He could love, praise and respect the earth!
- Why?
- Because he is a loving man!
- He is a loving man and he loves the earth!
- He loves it and does not realize what he is doing to the earth!
- Why?
- Because he is thinking!

He is thinking and does not realize that he is not thinking!

- That is his problem!
- He is thinking on and on and does not realize that he is not thinking!
- He is thinking on and on and does not comprehend that it is not him who is thinking!
- It is not him who is thinking and he does not realize that there is someone else thinking instead of him!
- The EGO! The EGO is thinking instead of him. The EGO makes him believe he is thinking.
- The EGO makes him believe, that **he is thinking himself!**
- That is not the case! He is not thinking but the EGO makes him believe so!

The EGO makes him believe, he could still save the earth!

- That is the problem!
- Man is thinking he could still save the earth!
- He can still save it but not with his thinking!
- He can only save it by changing his way of thinking!
- He can save the earth by changing his way of thinking and by recognizing the necessity of doing so!
- He must change his way of thinking or else the earth will die!

The earth dies!

- Why does the earth die?
- It dies because man destroys it through his garbage!
- It dies because man does not comprehend that he destroys it!
- Man keeps producing garbage. He keeps producing and dumping it!
- He dumps and throws it everywhere on earth!
- He throws it everywhere on earth and suffocates the earth!

He suffocates the earth with his garbage!

- It is his garbage that makes the earth die!
- It is his garbage that let the earth suffocate!
- Man will suffocate with his garbage, too!
- That is as the earth cannot provide him anymore!

It cannot provide him anymore means: “The earth itself can only let him suffocate!”

- Why? Because he takes its oxygen!

Oxygen is missing!

- Oxygen is missing, because more and more the earth is being filled with garbage!
- Men dump their garbage everywhere on earth. They dump it everywhere and do not care about it.
- They do not realize, that by doing so they do harm to themselves!
- They do harm to themselves as they do harm to the earth!
- By doing so they are going to suffocate the earth!

They are going to suffocate the Earth and themselves!

- That is because they are taking the earth's oxygen!
- They are taking the Earth's oxygen and do not comprehend what they are doing!
- They do not comprehend because they think this is not happening!
- They cannot recognize that this is happening!
- But this is happening and they do not know that it is!
- They are just ignorant. They are ignorant and do not recognize that they are doing harm to themselves!

The Earth surrenders!

- The earth surrenders and man will have to surrender!
- He will have to surrender because the earth has to defend itself!
- It has to defend or else it is suffocating!
- It is suffocating because there is no oxygen left!
- There is no oxygen left and the Earth has to defend itself to get oxygen back!
- How can it do this?

It can do this by shaking men into action!

- It shakes men into action by showing them enormous environmental disasters and the necessity to change their way of thinking!
- The climatic catastrophe cannot be prevented any more!
- The earth must show its face. It must show its face as men do not comprehend that they have to do something!
- Men do nothing. They believe that they are still able to do something. They can but they have to change their way of thinking!

Man does not change his way of thinking!

- He keeps on producing garbage! He is producing garbage and does not comprehend that he is doing so!
- He is doing so and thus telling the earth: “I do not care what you want!”
- I want! I can! I want and I can do everything!
- That is not true! Man cannot destroy the earth!
- He cannot destroy it as then he destroys himself!
