

**This is the story of those
who supposedly want to
run the world**

Summary of Tweets
for those who want to understand

The last words, people of the world: "you can do it. You, and only you, can do it. It is up to you, to do it, and end something in the history of mankind, which is so disgusting, that nobody, who is a human being, can see it. End it, people of the world!!!"

It is your world, people of the world. It is your world, which is suffering. The human beings on this world are collectively suffering because of only a very few people. This is true. True, and can change, if you are there, people of the world.

Your action is called upon. You are now those, who can do something. Collectively. You can stand up. No revolution, but saying "no". Say no. Say no. Say no!!! No, to all the things, which hinder the world to be.

If not, people of the world, this is important now for you: "there is nothing, which can help you, to escape your responsibility. Nothing, people of the world. You are there, watching what happens. You are there, doing, what you do."

You are there, people of the world, adults, who can do something. Who can change. Change, what is definitely necessary, to be changed. You cannot leave the world, like it is. You are also responsible for all the things, which happen. Are you aware of this?

Your children trust. Trust in you. You are their representatives. For those children particularly, who have no chance today, to express their opinion. To decide for themselves. You are there to protect their lives. You are there for that.

It is all, people of the world. It is your world. You decide. Do, what you want. It is not easy, but you have the chance to do it. To do it, and thus also save the world for your children. For your children, who have no chance, when you do not act.

Use your way. Go and do, what is possible. Do, what has been written about. Do, what you can do. You, and other people, who join you. Freedom. Not Action. No brutal action. No, this is not necessary. Take, what is yours.

Require what is your right. The right of a citizen. Never loose your human behaviour. Never use, what they used. Brutal action. This is not humanity. This is nothing. This is nothing, and can do nothing. No revolution. No brutal action. No! No! No!

Cooperate. Work together. Stand together. Be together. You are the peoples. You are the ones, who have the constitutional rights. You are the ones, who can require something. That, what you can do as the citizen of your state. Require!!!

Do not wait for your governments. They were just all the time supporting the system, which took everything from you. Wait for nobody. Do everybody of you, what he can do. See, what you can do. It is a lot. You can do it, and can ask also other people.

It is all said many times already, people of the world. The world is now waiting for you to act. Do not wait for a postive action of them. It will not be. It will only be, that they go further. Steal more from you, every day.

It is a system, which does only one thing: "it steals the money of the people, and makes them richer every minute a day." People are nothing for them. People can only be useful. People do only matter, when they are useful.

They are not only not fair in their behaviour but also not fair to anybody, who is buying from them. They buy very cheap in countries, where they just use very cheap workforce and resources, and sell it in the rich countries at very high prices. Stop supporting companies, which buy their products in countries at very low cost and employ children, or their workers only for nothing. They do not, what you want. They are not at all fair in their behaviour.

Stop also all the purchases of brands. You do not need to pay things, which do nothing for you. Pay no brand products. Stop also to buy from retail organizations, which you do not know, who their owners are. Anyway, no international company anymore.

To take all your money from your bank is not only that, what you can do. You can stop to buy from them. No international company get any order anymore from you. Let them know, that you are there. There, and nomore there for them.

They have nomore the money available, which they would have, if you continue to give them your money. Ask your bank to give it all to you. Ask them, and be very strict to get it. It is your money. Just make sure, that they give it to you.

It is important, that you recognize, that this is a way for you. That you can do, what they would not like. Not like, and would very much hurt them in all, what they do. They cannot then anymore do, what they want.

It is all written here. You can read, what you can do. You can decide, to do, what only you can do. You can ruin their base for all their businesses. That is, what you can do. Nothing else, but this. You can do it, people of the world.

You stop them, when you ruin their moneybuilding. You stop them, when you ruin their brand building. You stop them, when you ruin their bank building. You stop them, when you stop, to give them your money.

You allow people, who are nomore knowing, what they do, to be. To act, like they act. To do so much harm to all people of the world. You are there. You can stop them. You can do, what you can do. Something, which will stop them.

This is, what you should recognize. This is, what you should be aware of. This is, what you should be not only aware of, but should also know, that this is the problem of you. You allow something, which you should never allow.

People of the world, you should recognize, that this is the world, you live in. You allow these people to reign you. To do, what they do. You, people of the world allow this. That they can do, what they want.

People of the world, you are human beings. You are not there to be with livings on your way. You are there to do something, which is good. Livings cannot do this. They are lost. They are nomore able to do anything which is good.

This is not. Not something, which can be. This is not something, which is possible. Possible cannot be, that human beings are reigned by livings, who lost everything. Everything, which makes a human being a human being.

Human beings cannot do, what they do. They are nomore human beings. They are livings, which are human beings, without anything. Their heart is broken. Their mind is lost. They are lost. Lost, but living.

Nothing anymore in common with human beings. They are livings. Livings, which are nomore there. Not able to see. Not able to hear. They lost everything. Everything, which matters for a human being.

It is not good, that so many people suffer, because of them. People of the world suffer, because of a very few people, who lost their mind and control about oneself. They are nomore oneself. They changed.

Not good is, that they are nomore human beings. They are livings, which are nomore there. They cannot be. They are nomore controlling, what they think. They are lost. They are nomore there. They are gone. Out of control.

It is not possible, that they do something with the people of the world, which is so disgusting, that noone could imagine, what they want to do. It is out. They have gone too far. Too far to go, is not good.

It is over. This is the only thing, which can stop them. It is over, means: "it cannot be. It will not be. It will not be, that you are reigning the world. It will not be, that you make all people in the world, slaves of you."

This is not possible.

It is over. This is the only thing, which can stop them. It is over, means: "it cannot be. It will not be. It will not be, that you are reigning the world. It will not be, that you make all people in the world, slaves of you."

This is not possible.

If you regard this, people of the world, you can understand, what happens. They are doing, what they want. They must do it. There is no doubt, that they must do it. Nothing can stop them, except all the things, which make them understand, it is over.

This is, why they can do everything. Their thoughts are pushing them all the time. They are nothing anymore. They are the product of their thoughts.

Nothing can stop them. Why? Because they lost control about their thoughts. Too much pressure from them.

They believe in that. "I am the one and only. I have some competitors. Yes, they are there, but I do not care. I will be better. I will be tougher. I will be more aggressive, than they are." All these thoughts are their thoughts.

Believe it: "they are there."

They do all these things, just, to keep going. They are forced by their thoughts, to do every day something more. They think like: "you have now to show up. You have now to demonstrate. You have now to show all people, that you are the one and only."

Scrupel is something, which these people do not have. Why? Because they think, that they have to do All, they do. They are convinced, that they must do it. They do not see anything anymore. They do everything, to keep it going. They just do it.

They thought, but they did not do, what they thought. They all the time took them over. Means: "they cheated them and took all the money they had." They not only cheated them, but also robbed them out, like they wanted. They did not have any scupel.

A power, which they got, because the people let them get it. They thought, they will do it. They thought, they can do it. They thought, that they will be honest. They thought, that they will not use their money and power against them. They thought!!!

People accepted this? No! From time to time they went angry, and they fought against them. But nothing changed. They brutally turned them down. They killed all the people of them. All of them they killed, to show their power.

History shows all the time the same picture. A few reign a lot of people. They are there to be their slaves. They want them to be slaves. Their understanding of human life is: "they are there to be our slaves." Nothing against this was done all the time?

Thoughts. Thoughts are. They can be controlled. They cannot control their thoughts anymore. They are lost, means: "they cannot control their thoughts anymore." Thus they are able to do anything. This is always the same. The same picture in history.

Everything means: "everything." They are nomore there. They are only seeing, what they want to see. Their thoughts are terrible. So terrible, that you could not stand it. They have thoughts, which even you could not have, without being terribly touched.

Every day, also in the history of man kind, they became more of that, what we see today. They lost their mind. They lost all the things, which are that, what makes a human being. They lost honesty. They lost any scupel. They did everything.

This, people of the world, is, what all the time in the history of man kind, the few thought, who claimed to know all best. They said: "we know, what you have to do. We know, what you should do. We know, what is necessary to do."

You can think All, means: "you can also think, that all the people in the world are there to be my slaves. You can think, that all, what they have, is mine. You can also think, that, what they do, is what I will tell them. "

You can see, people of the world, what happens, when people are nomore able to escape their thoughts. When they are nomore able to live their life without crazy thoughts. Crazy means: "you are nomore able to control, what you think. You can think All."

The nightmare could be extended in writing. All the things they want, would fill many books. Nothing is it, what can ever help people to be. They are crazy, thus we cannot expect, that they think differently. They are slaves of their thoughts.

It is a nightmare, what they have installed everywhere. A nightmare, which can only lead to something: "people completely dependent on them. People completely under control of them. People only there. Nothing worth. With or without money."

People of the world, are you aware of that, that they know, what you are doing all the time? They know it with the cameras they have installed in your mobile phones. They know everything, what you do and speak, if they want to know it.

People of the world, are you aware of the fact, that they are already using machines, to kill people. Kill them in wars. Kill them, when they decide, it should happen. They send machines to somewhere to kill somebody. They do not need people anymore.

People of the world, are you aware of the fact, that they want something to do, what we had already once. A regime, who wanted only people, who are special. Special in a way, that they think linear. That they accept everything.
Who are not there.

People of the world, are you aware of the fact, that they want something to do, what we had already once. A regime, who wanted only people, who are special. Special in a way, that they think linear. That they accept everything.
Who are not there.

People of the world, are you aware of the fact, that they are prepared to take the leadership of the world? Are you aware, that this is the end of humanity? Are you aware, friends, fathers, mothers that this is the end of human beings?

People of the world, it is not your way. It is not, that you are there on earth, to be guided by crazy people. You are not guided at all by them, but they claim, that they will be your leaders. Leaders, who not know, what leaders should do.

It is true. They want to do this, and are prepared for this. They have installed it already in the bodies of many people in the world. Microchips, which allow them, to control people totally. Unbelievable, that people are accepting this.

You do not believe this? Yes, you can. It is a thought, which is really hard to believe. You cannot believe, that human beings are able to think like that. You cannot believe, that this can be true. These crazy thoughts.

Crazy, what is standing here? No! These are only the crazy thoughts, which people can develop. They are crazy enough, to think like that. They believe, that they can do this. Making human beings machines, which they can use.

It is all there to realize this. It is there, that they can do it. They have prepared for this. They are completely dedicated to do this. They want people be a machine, which does everything, they want.

This scenario is true, people of the world. They want you to become a machine, which they can program and make you dependent. This is their illness. They are occupied by the thought, that you are becoming a machine, which they can use for their purposes.

You are not there with all, what you are, means: "you are not a human being anymore, but change to a machine, which will be programmed, if you continue to accept, that they do, what they want to do all the time."

This is also important, people of the world, that you finally recognize, that you thus give up to be, what you are. A human being, who is not there, because you are not thinking anymore, what you would like to think.

It is the most important for you to know, that they are in your head. Every day in your head, making sure, that your thoughts are with them. With that, what they want you to think. They are using all their knowledge, to do this. Are you aware of this, people of the world? That they are there and let you think, what they want, that you think. Are you aware of that?

Masters in confusing people. They do it all the time. Daily, they influence you with their knowledge about thoughts. They are just brutally using their knowledge about thoughts and are influencing you, like they want.

You decide, what thoughts can do with you. You decide, what they can do with you, who know, that thoughts can influence people. Who know, that thoughts are there, to influence people and to make them confused if necessary. They are masters in that.

This is, what you should know. It is only a thought, which can also make you fear what happens. It is a thought, which can fire your emotion. It is a thought, which can do everything with you, when you allow him, to do with you, what he wants.

It is a thought, which keeps you busy? No! Thoughts are always there. They all keep you busy. Busy and occupied. Occupied with what they let you think. It is their task, to keep you occupied all the time, as long as you do not see, that it is only a thought.

They are gone means: "they were just there and kept you busy. Many thoughts kept you busy all the time." You are not concentrated. You do not know, what you thought. You think, that you cannot think, because you cannot catch your thoughts.

When you watch your thoughts, people of the world, you will recognize many things. First of all, that they constantly change. Second, they are not coming and do something, no, they are just always coming, and after seconds, they are gone.

Your thoughts have a power. A big power. They can take you over. You do not recognize it, and they are many, who keep you constantly busy. Not concentrated. Always busy with thoughts. This is true. Watch it, people of the world.

You are not there, when you are not with you. Means: "you let your thoughts just come and go." This has as a consequence, that you do not recognize, that something happens with you. It is not good, what happens now. Your thoughts are taking you over.

They are there. Your thoughts. There all the time, and you cannot concentrate. Watch this. It is very difficult for you to stay with one thought. This is the reason, why you are from time to time confused. Confused, and also not there.

People of the world, you are doing too much at the same time. Why is that so? You think. Your thoughts are there. All the time. It is, and you follow. Follow your thoughts. No!!! You cannot do this. Why? Because they are so fast coming and going.

Watch, people of the world, what is, when you think other. Watch, people of the world, when you think, and when you do. You do differently, when you are with you. This is important, that you are with you. With you to be, is not easy, because you think.

Watch, people of the world, what you do. Watch, what you think. Watch, your ability to recognize, what happens to you, when you think the way, you think. Watch all, what you think. It is important that you see. See, what is. What your thoughts can do.

Anyway, they just are there to make their profit. To be there, and do, what they want. Making use of everything, which helps them, to make more profit and get access to channels, which allow them to exploit the potential of money, which is available.

International companies of them do nothing of that. They avoid paying taxes; they are not investing their profits in the countries they operate; they leave, whenever it is no more profitable enough; they have no interest in the people, who work for them.

Income for all means: "they contribute all. They contribute with employing people; they contribute, with paying taxes; they contribute with investing in the country the money they earn; they contribute with all the things, they do for the community."

Economists claim, that the international companies are important. Yes, that can be, but most important are the small and medium sized companies. They all together deliver in all the countries of the world the major part of the income for all.

Entrepreneurs all over the world thus have also a problem. They have to pay taxes, therefore they have a severe disadvantage versus the international companies. They cannot build up the same cash reserves they can do. Their companies, who do not pay taxes.

With the taxes avoided by this system, they can buy thousands of companies at no cost. Means, they did not pay taxes, like you do, people of the world, and are thus able with the saved money to buy the companies they want.

Help local people to exist with their businesses. They help you also. They pay taxes. International companies do not pay taxes. They pay practically nothing. This is true. They have their money parked in tax heavens, all over the world.

People of the world, watch carefully, what you do. Watch every buy. Buy nothing from them. Buy from local people. Yes, it might cost you a little bit more, but you know the people. You can support them. You can help them.

Buying from these companies any product means: "you are just supporting, what they do. You are somebody, who is helping them. You are somebody, who is saying yes to their behaviour. You are somebody, who is making it possible, that they are there."

Children included. They employ children, to reduce cost of labor. People of the world, do you see this? The companies are many, who are reported to use children in their workforce at cost, which are so low, that you cannot see it.

Low prices, means: "nothing." Cost of labor is nothing, that is their target. Then they take the people, and do with them, what they want. Means: "they have to do things, which are unbelievable." Not protected people can be treated like they want.

They are not interested in people. Yes, that is true. They do not want people. Therefore they are also not reluctant, to make them work at very low prices. Means: "they go with their companies to countries, which offer them people at very low prices."

Second, they move the company to another country, where they play the same game. Games, they play all the time, worldwide. They are not interested in the companies per se, but in what they can deliver. Deliver in money. Deliver for them.

They offer jobs to the government. Then they get a lot of support in all directions. We do not see, in which directions. Then they come. Build a company. Then the company does not deliver fast enough, what they expect. Then they fire people first.

Has this helped us, people of the world? No!!! They got, what they want. We also pay the invoice for that from our budgets. This is, what happens all the time. They do further things, which are also in the same direction.

The jobs are a good argument for the governments, to say: "yes, we are supporting you. We give you money, when you stay. We give you money, when you stay, and do not let people go." They stay for the moment. Then, when they have the money, they go.

What happens, when we say no to that? Then they would have a big problem. To much money is lost in their operations. They are crazy. They always are doing something, and not always it is good for them. Then they come. They wave their hands. They offer jobs.

This should then go on their bank account. Should cost them a lot. No!!! This cannot be. Then you, people of the world, must pay the invoice. You have to pay it via your taxes and all the things, you have to pay. Your governments are deciding that.

This is the key to all. The financial industry gives them credit. Credit and everything, they want. They finance everything, they want to finance. No limit. They can do it, because they own the banks. They from time to time let them also fail. Go bankrupt.

One goal. Profit. Nothing else. They have done this all the time. Let's increase profit is the message. They control the big corporations all over the world. Nothing is left. They control all banks. Therefore they control the whole financial industry.

They make sure, that the companies are managed by their people. So in the boards they make fire. They put finally their people in. Then they look, what they can do. They fire people, to reduce cost. They merge with other companies. They fire further people.

The international companies are all in their hands via constructions which are very clever. With little money they control most of the companies. They buy strategic sharevolumes. Then they start to make their influence happen. They fire people.

It is easy. Their companies are all big. Their companies are not national companies, but international companies. Acting worldwide. This is the general picture. They have national companies also, but these are only less, compared to the international ones.

Let us watch, what it is. Let us watch, what they do for us. Let us watch, what it is, that they can do for us. Let us watch, what happens, when we do, what they want. Let us watch, what happens, when we stop them, nomore buying, what they offer to us.

Businesses, which all of us, people of the world, are financing. With our money we finance the businesses of them. Huge businesses, they have. Nothing, which is really important for us. Nothing, which helps us, to live.

Make them be, of course also, what can help them. Them, who own the media. They are there. They can give. They can allow. They can also ask for help. Help, which they need, to increase their businesses.

People in politics always want to be seen. They get it. They get it via their media. They make them happen. This means: "they can push them. Push them to the top. Push them, wherever they want to go. Push them, and make them be."

Media business is one of the most important businesses they have. Why? Because the side effects of what they can do with them, are so enormous. They are enormous, because with them, they create influence. People want to be seen. They make it happen.

Their strategies are good. They can employ thousands of experts on this. They do it. They bought all the media in the world, to do this. There is no media corporation anymore, which is not in their hands. This is true. They like their media.

It pays a lot. It pays them a lot of money, your thoughts. Your activities, following your thoughts. You buy a lot of things, which you never use, but you buy them. This is, what happens, people of the world, all the time. You buy. They like this very much.

You think, what you think, and then you consume. You consume again, what they tell you. It is nothing else, than that, what they told you before. A fake-story. Fakes all the time, to keep the level of insecurity always high. This is their strategy. It pays.

Insecurity is their target. You should believe, that there is something all the time. They do it, and can thus achieve, that you are constantly thinking. Thinking, that the probability, that there is something, is very high. Nothing is there, but you think.

This would be a major change in you. You would be free. Free of all the things, they tell you, that they are. Most of them are not. They call it fake. Fake is nothing else, than that, what they create. They create fake, to make you insecure.

It helps you. Your thinking will be different. You think not constantly something negative. You are nomore there. There, on the negative thinking street, created by their messages. They are gone. You are nomore influenced in your thinking, by them.

It is very easy. You, people of the world, can also hurt them. You can hurt them severely. You can stop their businesses. Huge businesses, when you do this. Stop it, and see. Stop it, and do then something else. Watch, what it does with you.

With this change you would really hurt them severely. Why? Because they would no more be able to reach you. Their campaigns would nomore work. They could not sell advertising anymore. They would be left alone with their products. Do you see that???

A thought, which can be created by negative messages. This is the principle. You allow them to keep you on a high fear level. You allow them, to do this, when you consume their media. You can change this from one day to another. You can change this!!!

Fear sells a lot of other things. Fear helps them in many ways. They can sell practically everything. Security. Weapons. Tablets. Name it. All of that, which you think, that it can help you, to overcome your fear. Fear, which is only a thought.

You can stop it. You do not buy their media anymore. Then they could not reach you anymore. Then they would also loose an enormous business. This business is the advertising business. It is huge. It is not only huge but has the side effect, that you fear.

It is interesting, that you do not see this. You constantly read and consume, what they are telling you, via their media. Thus, you are just accepting, that they fill you with all the negative thoughts. Can you stop this? Of course!!!

It is their strategy. It is, what it is. It is brutal, but you cannot avoid this, as long as you think, like you think. As long as you let it happen, that they can influence you with their constant negative campaigning. Make fear in you.

Weapons they have in their product lines, and like it very much. Why?

Because it is the most profitable business in the world. Everything connected to weapons is good. They sell better, the more fear you have.

Thus, let's constantly create fear.

Their strategies are brutal. Fear is good for their business . Fear and all the things, which are related to that. They initiate with that, that you are then looking for security. More security all the time. Weapons are better sold.

They know about the negative thoughts. They know, what it can do with people. They have all sorts of experts under way, to make sure, that never stops, what helps them, to make you fear and thus have you under control.

And let you fear all the time.

Negativ thinking is their major target in their media strategies. They have made all their media focussing on negative messages. Negative messages from the morning to the evening. They know, what then happens.

They know it!!!

If you, people of the world, fear something, they can easily for them, make sure, that you will stay on the street of negative thoughts. It is a street of negative thoughts, which they want to create, to make sure, that you are constantly negativ thinking.

Because they want, that you fear. When you fear, they know, that it is more easy for them, to control you. To make sure, that you do, what they want. You can see this. They always campaign things, which are targeted so, that you fear.

These negative thoughts are not representing the reality. They just come. Come, when you are in a situation, which makes you think negative. In our actual world, they, who are reigning us, are very much interested in negative thoughts. Why?

Negative feelings like fear. Fear is something, which is the result of thoughts, which are related to something, which make you believe, that something can happen to you. Be aware of the fact, that these feelings are only the result of your negativ thoughts.

This, people of the world, is of utmost importance for you. Questioning your thoughts. Watch your thoughts. When they do something with you, then be careful. Watch, what they do with you. Negative thoughts will create negative feelings in you.

Thinking is. Your thoughts are there. They are important. They are only a problem, when you allow them, to do with you everything. When you are not questioning your thoughts. When you just accept them.

By all means, people of the world, start to change your thinking. Stay with this task. Learn about your thinking. Listen all, what you can, to understand, what this means. You can thus change your life.

You know enough, people of the world. You can go. You can do, what you want. You are there. You are there to do, what you want. But, you have to change. To change your thinking about you. You can do it. It is necessary, that you do it.

it is such, people of the world, you can do All. You can do it, and you are prepared. You are knowing, what you can. You just thought other. You thought, that you do not know anything. You thought you do not know enough.

All, means: "you can fulfill, what you wanted to do, when you came to earth." This is All. You can do All and this is, what you should do. You do All, what you can. You can All, what your capabilities bring with it. You have many capabilities. Just use them.

People of the world, you change and you see, what it does with you. It can be of enormous power. It can help you in a way, which you do not see now. You can then do, what you want to do. You can do, what is necessary. You can do All.

People of the world, are you aware of that? What does it mean? You should be aware, that everything, is possible. You change, then it is possible, that things change, which you cannot believe now. You change, and you will see, what it does with you.

This is no theory. This is experience. This is nothing, which people can say: "we do not know this." No, they know, what happens, when it is the case, that the nature is moving. It can move everything. Everything, which you also cannot imagine.

People of the world, do you see the nature? Do you see, what it can do? Do you see, what kind of power the nature can use to let something go? Do you see that? Yes, you see it. Then you can imagine, that the Creation can do All.

It is now, that the Creation cannot move, would be the conclusion, when you are not moving. No! This is not the case. It can move. It is All. It is not only All, but can do everything. This is, what you have to understand. It can do everything.

It is necessary for you, people of the world, to understand, that you are a part of the Creation. You are important for the Creation. You cannot assume, that you are just there. You are an important part, who has to move with the Creation.

To help the Creation, to go further. You have already heard about this - the Creation. This is All. All, which is around you. All, and everything, which you can see and not see. You are part of the Creation.

This to understand, is necessary.

People of the world, you are there. Why? Do you think, that you are there, just to be there. This would not make sense. Sense does make, that you are there, to do something. To be. To act. To create. To apply your capabilities.

To help.

The way. The way you are looking for, is there. It is always there. You can choose to take it. The way is always there, means: "you can go it, when you want." Ask for help. Learn. Do. Thank for help. Ask for help. Learn. Do.

Thank for help.

It is your life. You go and do, what you want. You can go also with God. God is there. Helpers are there. Ask for help. Learn to ask for help. Learn to say thank you, when help has found you. You decide, people of the world, if you

want to do that.

What can God then do? Nothing? No! He can try. Helpers can try. If you do not see them, if you do not allow them, to help you, you go your way. It is simple. You decide. You decide, what happens to you. You are responsible

for your own.

God is there. God see. God want to help. If you do not want help, God can do nothing. It is your decision. It is not to overcome by God. You decide, that you do not need help. You are also not asking for help. You are just

going your way.

God is there. He can do All. Yes. But he cannot do something against your will. Means: "you want to do something, then you can do it." This is a law.

This law has also to be obeyed by God. Do you know this?

That this is a God's-law?

Their life is also endless. Yes, this is the case. They also know this. They do everything, to extend it, but at the end, they also will die. Die, and then? This is the question for you. Why God, do you allow all of this? Why God, can they do all of this?

It is, how they protect themselves against every feeling, that they are wrong. That they do things, which a human being never could do. They must think like that. That people do not matter. That people are nothing. That people are not worth to live.

If they would change the thinking - that people are nothing - they could not do anymore, what they do. They could not do all the harm to people, which they do constantly. They would stop this.

They make changes. They make it, but not in one respect. They do not change their opinion about people. They are nothing for them. This cannot go. It cannot go, because this is, what let them do, what they do.

There are a lot of means to do this. They do everything, to make sure, that they survive. They change then also, when it is necessary. They know it. They know, that change is necessary. They know it, and go for it.

They are there. They have made everything, to protect themselves. They have all the specialists available you could think of. They have invested a lot of money in their lives. They want to have a long life. They do everything, to keep it.

People of the world, also they have cancer, but they have money and possibilities to fight it. They do it and you do not see, what happens to them. You do not see it, because they are not visible. Private things are private things. Nobody hears about it.

We do not know this. We just see nothing, what happens to them. God, you are with them, we could believe. We have a lot of arguments for that, that they all should have the most dangerous cancer in the world.

We, people of the world have cancer. We have it, and have to carry, what comes with it. We do something. We leave the earth. Both is possible. We are not able to escape. They seem to have a life without any cancer.

It is enough now, of the cancer, which is so widespread in the world. This cancer is that, created by a very few people. They are there. They do all. All, what human beings never should do. This is the cancer. They constantly do, what human beings cannot do.

Cancer makes the people fear. It is not to fear, when people recognize, that they must change something. It is a signal for them. It is a signal, which tells them: "it is enough. Enough of the same. Enough of what you constantly do."

The cancer is also there in the people. They have cancer and know, that something is not good. They know it, and can then decide. Decide to change, or to carry the consequences of not changing. This is true.

You know it.

You can see. See what happens. You have no argument anymore regarding the change. You must do it. It is necessary. You must do it. It is a cancer, which is spread all over the world. Which shows you, that no alternative is anymore there. You have to go.

You cannot see this. You want stability. You want to go further, like you did it since many years. You do not want to stop the things, which always make you more dependent. Which kill your life. Kill means: "you are killing your life oneself."

This can be. This is the case. This can be and will be, when you continue to be reluctant to change. The change must be accepted by you. The change must become a necessity to you. You must see. See, that it is necessary. No alternative to that.

This is also a fact. You hinder yourself to do, what you can do. You are standing in your own way. You are not prepared to change. You are not believing in you. You are not believing in the power of people.

Because, people of the world, you are hindered to do, what you want. You want something else. You want to do. You want to go. You can go. You can do. Nothing is there, which can hinder you. But you can hinder yourself, to do, what you can do.

It is a nightmare for people, what they think. It is a nightmare for everything, what they think. This cannot be. The nightmare cannot be further. It is something, which cannot be. This is to believe. It cannot be. Why?

They think, that there are too many people on the earth. They only want to have so many, that everything can be kept working properly, to their satisfaction. They have clear ideas on that. They want it such. They are working on the target, to achieve this.

They think that, and do everything, to make this happen. They think, that machines can do everything. They are constantly testing machines. Machines, who could replace human beings, and thus make them independent of them.

It is such, people of the world. You cannot change this. They think like that. They are nomore there. They believe in this. People are nothing, and can only be useful. They believe also, that they are easily to replace.

This is, what you have to face. It is a fact. They do not regard you important. They are the opinion, that you are just there to do, what you are said to do. You are in their eyes nothing, means: "they only allow you to be, as long as you are useful."

People of the world, you will not succeed, when you do further, what you do. You are not there. You are not doing, what you want. You are somebody, who is not seen. Nothing worth in their eyes.

It is thus not impossible, what you want. It is not impossible, but it is impossible, that you go further, like now. You get nothing. You are nothing. You will be nothing. You will loose All. Why? Because - people of the world, they want, that you loose All.

It is now your time, people of the world. You change All. All, what happend into that, what can help you, to live another life. This is, what can be done. It can be done, and there are a lot of people, who know, how it can be done. They can help to do it.

This you wanted not. You just wanted to be there, and to watch, what happens then. This you cannot do. You must be with them. You must together work for your country. You cannot leave yours countries destiny to a few people. People, who are not always good.

This has to be changed. But how? Who can change this? You, people of the world. You must be ready to take then responsibility. You cannot refuse that. You have to take it. You have to take responsibility for that, what you can do. You can do a lot.

The governments and parliaments of the world has to be other. They are not democrates. Democrates would never do, what they do. They are just there, to follow up the interests of a very few people in the whole world.

All of this, people of the world, is not positive. It is not only not positive, but it makes you fear. You do not need to fear this. Why? Because you are the ones in your country, who elect the government and the parliament. You can ask for change.

Health is relevant. Health is relevant for all of you, people of the world. This they know. Thus, this business they like very much. It can be supported by means, which ruin the health of people. It can be.

Water is a good example for this.

This is true. You can see it, if you want. Your health is their target. You can see this all the time. The advertising expenditures of this industry shows this. No advertising activity without an ad of health products.

It is an industry, which is so big, that you cannot imagine, how big it is, and how profitable it is. It is the health industry. It is very big. Besides the military businesses of them, it is the most profitable business in the world.

Do you know, people of the world, that they do this by intention? Do you know this, people of the world, that this can help their other companies to grow steadily? Do you know, that these companies are there, to address your health?

People of the world, your health is a result of all the measures, they undertook, to increase their overall businesses. Businesses, which are nothing. Only businesses, which do harm to people, in most of the cases. Which in the long run do affect people.

Something means: "further bad drinks." Drinks, which are full of sugar. Sugar is very bad for people. Not only very bad, but ruining them, when it is industrial sugar. Sugar, which is changed by chemical means. Means, which are not natural.

Billions of people in the world have to drink bad water. Water which is ruining their health. This is a catastrophe for the people. They have no choice, to escape the bad water. They just are there, and must drink something.

The water you drink is bad. Why? Because it destroys your organs over time, when it is destroyed by chemicals, which they use, to keep the water drinkable. It is not drinkable, but the people have no choice. They have to drink it.

Water, people of the world, cannot go. Water is there. It is there, and can do, what is necessary. Water is good for you. Water is healthy. Water helps you to clean your organs. Water helps you in many ways. Water is important for you. Bring it back to you!!!

The water reserves are yours, people in the world. Nobody can take them, without your approval. You just gave the authority to your governments over the water reserves. They sold them. Most of them did this. Now you see, what happend.

Water is an enormous business for them. This is true. Their companies have bought all the reserves worldwide, to make sure, that they can sell enough water. This cannot be, if the countries stop them in their activities. Get the water reserves back.

Water, people of the world, can be under your control. Ask just your government, why it is not under your control. Under the control of people, who are there, and know, what this means: "to have your water under control."

Water, people in the world, is not only of utmost importance to you, but also for the industry in your country. They have also most of your industry in your country under control. They thus make the price. The price also for water for your industry.

Water, which belongs to you. It is your water in the countries, you live in. It is your water, which they bought from your governments and companies. Which they have now under control. They do with it, what they want.

Water, people in the world, is a gift. It is a gift, which cannot be evaluated highly enough. It is a gift, which they destroyed with all their activities. They have bought all the water reserves in the world. Bought, and under control.

Water, people of the world, is of utmost importance to you. The water, which is in nature, is healthy. Can help you, to stay healthy. This is true. Try the water in the mountains, and you will see. See, what kind of water you are drinking in your homes.

Water, people in the world, has been destroyed. Means: "it was made bad. Bad, and not to drink. Bad, and destroying your organs over time." This is, what they do and did. They have no reluctance, to do this, because it is an enormously big business for them.

Water, imagine, people of the world, has been made not available for all the people in the world, to make sure, that they can sell as much as possible water. They want it, and it happened. There is no place anymore, where they do not sell their water.

The nature is there to give you All, people of the world. It is enough there, for all of you, people of the world. They only organized carcity, that they can make their businesses. They made water bad, to make sure, that their water can be sold.

You are important, people of the world. Every living is important. It is important, because it does something. Contribute to the Creation. Go, and do something, which is necessary, that the Creation moves further.

This is the world, people of the world, which has to be changed into a world for people. For everything, which lives. Which is there, and want to do. Want do do, what it can do. It is a lot to do, people of the world, and it will never end.

This is the world, people of the world. You allow all of this. You can live with all of this. You do not see this? No! If you want, you can see it. You do not want to see it, because it is against everything, what human beings want to see.

They do now with them, what brings a lot more money, than everything, they can deliver with work. They are moving them from one place to another. They are just moving them for a lot of money. For all their money, the slaves have left.

These slaves are now coming to the rich countries. They have no alternative. They must go. They would not go, but they must go. They have no living in their countries. Are slaves, not payed and only suffering of all, what they do with them.

People of the world, they have a lot of experience with slavery. They have it already in many countries achieved. People are slaves. Payed, when they want. Given nothing for their work. Work, and work, and work. Get nothing for it. Slaves have no rights.

They are open. They say it now. They say it, and let it write. That you should be completely dependent. That you should be watched all the time. That you should be a slave. Slavery is, what they regard to be your destiny.

People of the world, you can do a lot. You can end all of this. It is important, that you come to the conclusion, that you do not get anything from them. They just want you to do, what they want. They just want you, to be their slave.

It is nothing that, what they want, which is to the benefit of you, people of the world. They have no benefit for you. They just want to exploit you. To use you. Your potential? No, they do not believe in your potential. They believe only in your usefulness.

People of the world, you can go. You are there, to go. Do not believe, what they are telling you. That you are not strong. That you need their support. That you should do, what they are saying. That you should buy. Buy and be, like they want you, to be.

It is such, people of the world, that this you do not see. You do not see, that you are strong. You do not see, that you are valuable. You do not see, that you are capable. You do not see, that you can get help.

You are just seeing problems.

People of the world, you are strong. You are capable. You have everything with you. You can be with other people. You can get help. You can cooperate. You can do all the things, you want to do. Do, what you want. Be, what you are. Love, what you are and do.

I am. This can be. I am, this can be, and is. I am, this is. I am, this is All. All, what matters. I am, and then: "I am here to do, what I can. I can do a lot. I am somebody, who can do a lot. I am good. I am valuable. I am strong."

This is the most important: "you are there to be seen." See you, expresses that. See you, means: "I am with you. I am here. I am the human being, who is here. I am here, and I want to be seen. Seen, and do, what I can do."

I am!!!

Everything on earth matters. People matter. You are important, people of the world. You should regard this serious. You are important, people of the world. You are nothing, which can be used. Used and disregarded.

You are there, to be seen.

You are thus, people of the world, something. You are not something which matters. You are only something, used, to fulfill something. Something is not human. Something is not, what human beings are. They matter.

They are important.

It is all against you, people of the world. You should be there, but you are nothing, which is of interest, when there is a possibility, to replace you by something, which costs less, or does not make a problem, because it is complaining.

People are nothing for them. They are only a mean. A mean, which should not cost too much. A mean, which is there and can be replaced. Replaced ideally with machines. Machines do not ask for something. They are just there and deliver, what is programmed.

This is something, which these people do not regard important. Deliver and go. Deliver and go, where ever you want. I am not interested in you. I am only interested in what you deliver. No delivery, no fun. No fun and fired.

Yes, people can do a lot. Yes, people are there, also to do that, what they are here, to do it. Yes, people can do this, but they have also to be seen.

Seen, and fairly treated. To be seen is the most important.

They just use people. They use them and do nothing for them. Means: "they do not appreciate what people do. They are just useful." In their opinion people are just there to fullfill one task. The task is: "do never do something else than deliver."

They were not the people, who have been like that, when they come to earth. They became the people, they are. They do not move something. They just make money. Money, which they do not use. Use for the people.

People of the world, you are there to do this. To end the nightmare story of people, who never were there, to help people. They came here. They wanted other. They did not do. They are just not there.

This is the scenario, we are in, people of the world. You can see. It is not easy, but you are there. All the people in the world can do something. They can change everything. Everything needed, to end a story, which is a nightmare.

Real means: "they have the states in their hands." They finance everything. They own all the banks. They own all the mobile industry in the world. They own also the media. They can do everything, to discredit anybody. Also states. Thus also ruin states.

This is their major target. States are dependent on them. Their financial power. They give them credit. They get everything for that. This is already now a problem. But in the near future it will be such, that it is completely real.

But their future is very difficult. Why? Because everything will be lost for them. This is true. Everything. Why? Because they want us to be not able to handle our lives on our own. They want states, which are dependent, and keep the people dependent.

Your children now might not have a vote. They are there, hoping, that their parents look for their future. That they have a future. That they can do, what they want. That their parents are there, and do, what is necessary. Protect their future.

It is all up to you, people of the world, what you want now. Go, like you go. Stay and wait. Go and be. Go, and act. It is up to you. It is your life. It is not only your life, but also that of your children.

You must not do it on your own. You have in your community people, who understand. Ask them. Ask them to ask. Designate the best people you have in your country to find out, what is. Give them the authority to do this.

Is that a possibility? That our representatives in the government work for those people, who own all the companies in the world? This question you can openly ask, people of the world. Ask it, and find out, what happens. What the answer is.

Why can this be? This is a question, which you can also raise, people of the world. Why do our representatives do, what they are told to do? What kind of representatives do we have? Do we have people, who work in our interest?

It is such, that you can do all, people of the world. You can also ask your government, why they buy so many things from international companies, which are all in the same hands. A very few people in the whole world.

You can do also something, which is very bad for them. You can go and ask your government to show, how many banks of foreign origin they employ. If there are too many, ask for reduction. You are the people who elect the government.

No banks of an origin, which you do not know, will get your money anymore. You just take it. It is your money. You can ask for security. You can employ lawyers, who make sure, that your money is protected.

You can stop them, people of the world. Your governments, you can stop them. Just let your money on the banks go. Take it, and give it to banks, you can trust. You will find means, to make sure, that your money is protected.

Brands are also gone, let us assume. What else is then left. It is left, that governments are there. They give a lot of money to their banks. Billions every year. They give it on behalf of us, people of the world. Nothing can stop them?

You do not need brands. You are unique, people of the world. Brands are only an invention of them. Pushed and pushed, because they make huge mountains of money with them. Every year, with you, people of the world.

Their products are brand products. Brands are their very big game. They push brands all the time. Everything should be a brand. Nothing worth, but a brand. Pushed with billions of Dollars which finance their advertising campaigns.

The change is there, when you do this. When you say no! No! No! When you refuse. When you are nomore there for them. When you do not buy anymore products from them. Products, which are also much more expensive, than they can be.

Change all. All you can change. Go. Do nothing anymore, what you did before. Let them alone. Let them go. Nothing is anymore of the same, like now. You go. You find other solutions. You do not buy anymore from them. You buy from other people, you know.

You fear, that something can happen, when you do something. Nothing can happen to you. This is clear. It only happens, that they get a big problem, when you act other. When you show up. When you do all the things, you do, other. When you change.

People of the world, this is a short summary of your world. A short summary, of all the things, which are there, and how they are organized to make you not only dependent, but also reluctant, to move. You move not, because you fear.

The experts are experts designated. This means: "they are selected." Selected experts are many on the scene. This is clear. This is clear, when you see, that always the same experts are on stage. They are there, and say. Say, what they can say.

The last means: "all of their current money, or that, what they bought on credit." This is their way, to rob out people. They did it all the time. It is very difficult to understand, that experts do not see this.

Go, means: "find another bank." Of course, people are having a problem to find another bank within a short period of time. This is the game they play all the time. Making big advertising for low interest. Then increase them. Then get from the people the last.

This is true. Nothing can be more clear than this. It is very clear, that they do this, because they always did it the same way. Start with low interest. Increase it. Then put pressure on people to act. Act, means: "pay more for the credit or go."

This is one step also, to make them understand, that their time is gone. They would then stop to do, what they do. They would stop to raise interests up and down, just like they want it, to ruin most of the people, who bought something on credit.

Stop also to buy on credit. This would really hurt them very much. This would then make them a big problem, when people also would start to take their money from their bank accounts and bring it to banks, which they know, have no foreign owners.

The problem becomes even larger, when the people stop buying their products. When people refuse to buy from companies, they do not know the owners. The owners of most of the biggest companies of the world are the same people.

It is very bad for them, because it is something, which they count on. They count on this, because with this they strongly influence the buying activities of the people. When this does not happen anymore, they have a serious problem.

More problems they would even get, when companies start to stop their advertising activities. Activities, which just do nothing, than making people dependent. This could stop them in a way, which is very bad for them.

This is the scene. It is there, and nothing can make it other. No! If the people stop to read, what they are publishing, it is over. Over and out. They live of the people, who buy the media they sell. This is only one mean, to make them severe problems.

They also have influence on a lot of experts in the world. They own major universities. They own all the publishing companies in the world. They can get every book written, they want. This is true. Easy to find out.

Crisis is their major mean they have. They distribute the crisis all over the world with their media. They own all the media in the world. They do it, and can ask, that everything is written and published, what they want. This is true. Easy to find out.

War everywhere. Wars and pressure on the people. Whatever happens now is the outcome of this. Pressure all the time for the people. They create a crisis after another. They do it, and say: "it is a crisis, because you do not behave properly."

This is, what makes them so nervous. This is, what makes them feel, that they are under pressure. They must now do the last things. What are the last things? They are even more nasty, than those, they already did.

This should not hinder you to go. This is only a hint, that they are there. There to go. They have no other chance than that. Why? Because, if they do not achieve now, what they want, they are out. Out, because they did too much.

People of the world, you are there. Ready to go? No! Still you are reluctant to go. You are not aware of the fact, that they do not wait. They are not reluctant to go. They are ready to go. They do not want to hesitate anymore.

It is now, that you can show up. Show, that you are there. Ask for all. For clarification of what happens. You do not wait anymore for clarification. You ask for it. You do it. You want it. You are nomore the person, you were.

In this world, they, who reign us, want to separate us. They want to seperate us, to hinder us, to see. To see, what happens, when people are cooperating. When they are aware of that, what can happen, when they cooperate.

To go, and to be. People, who are there. There to move something. No! Not something, but All. All can be moved, when people act together. Cooperate and do all things together. They are then happy. Happy and satisfied, that they achieved something together.

Yes, this is,what you can do personally. You can also contribute to the community, you live in. You can do something there, which only you can contribute. You are not alone then. There are many, who help each other to go.

You do not believe in this? That is possible. You should then try at least, to move yourself in a direction, you know, makes you happy. This is, what you can do. You can also be with other people. Help, where it is needed. Do, what only you can do.

People of the world, this is your task. This is, what you can do. Change the world to the world, which is a world, which can help you all. All of you are here to be. To be and to act. To be, and to do, what you want. Help the Creation to move.

You are there, people of the world. You can do it. You can change, what has to be changed. You can do it, without them. Without those, who are not able to do it. They will not like you to do, what is necessary, but you are there, to do it.

Resources are all there to help people, to move. To move and to help the Creation to move. To go. To be. To go and to be, like all should be. Moving. Moving and moving further, further, and further. Nothing should be, which hinders that.

To see, what is. To see, what is really happening. To see, what can be. To see, what is, and can be, and will be, when all the people in the world work together. Share, what can be shared. Knowledge, capabilities and other resources.

This is also proven by their behaviour. They just made sure, that all the knowledge in the world was secured. Secured in a way, that they made sure, that only they had access to it. It was clear, what they wanted. Nobody should be able to see.

People, who are speaking like this, never had the intention, to let people be. They only had the intention, to make people understand, that they are nothing. Not capable, to do, what is necessary to do. Not there, to do anything relevant.

They wanted to say: "you cannot do, what we can do. You are not capable. You are not as good as we are." This is nothing. This is only, because they think. They think, and say: "this is true." It was never true. It was thus also never that, what should be.

It was never true, people of the world, what they told you all the time in history. They told you, that there are people, who are more important than others. They told you that, because they wanted you to do, what they want. Nothing else.

Human beings of the world, you are important. Everyone of you is important. You cannot believe this. You are said, that this you should never believe. This is your main problem. You believe something, which is just not true!

See that, and you are free. Free to go. Free to do, what you can do. You can do all the things, you want. You just decide. You go. You are, what you are. You are a human being, who is able. Who can do what he wants.

People of the world, this is just not true. You fail? No! You do not fail. You only fail, when you continue to do, what you do. Nothing is there, which is less than that, what you have. You have already nothing.

No! No! No! It cries it in you. It is not possible. You cannot do it. You cannot make a change. You can only stay with what you have. With what you are. You must do it. You cannot risk it. You just cannot risk to fail. To fail, and be nothing anymore.

You go now. You can go now. You can change, what has to be changed. It is there. It is there, what you need to ensure change. You can do it. You can make, what you want to make. You have everything with you, which is necessary, to make the change.

Other people. They matter like you. All the people are important. All the people in the world. Nobody is not important. Nobody can leave himself out. Nobody is there, who is not worth. Nobody is there, to be left alone, when he needs help.

You are here to change. To change, what is not good. You are here to go. You are here to do, what you want. You are here to overcome everything, which hinders you to go. You are here to be. To be, and to be together with other people.

This, people of the world is not, what you are here for. You are on earth to do, what you decided to do here. You wanted it. You came, to do it. You came, to do, what you want. So, people of the world, it is necessary, that you do, what you are here for.

It is like that, people of the world. You cannot see this. Why? Because you are not willing to see it. You are not searching for what you are. You are not looking out, for that, what could be there, for you. You are just there. There, to live.

You are unique, means: "you have the capabilities to be unique." You have everything with you. You can go. You can be. You can do, what you want. It is up to you, to do, what you want. You decide it. You go for it. You are, what you are.

It is like that, people of the world. You are all unique. You can be. You can do. Nobody else can do it, what you decided to do, when you came to earth. Nobody can do, what you want to do, because nobody wants to do the same like you.

A human being. A human being, who is, what he is. Unique. Unique, and there, to be. Unique, and there, to be, like he is. Unique, and there, to do, what he can do. He can do it. Nobody else can do it.

You are, what other's thought, you should be. Is that, what you want? Is that, what you are? Are you, what other's think, you should be? This is not the case. You are, what you are. You can be, what you are.

Other, so, like the other's wanted you to be. You became other, and could thus fulfill, what the other's expected from you. You became other, and you were then like they wanted you to be. That, what they thought, you should be.

No way for you to be other, because you do not see. You do not see, what happens with you. With you, who was other. Who was other, and could see. You saw a lot, but you were then not that, what was expected from you. You became other.

Blind, and also not there. You are not there, when you do not see all of this. You are then not living. You just exist. Exist, and do, what you think. You think, that you are there and do, what is necessary. No way for you, to be other.

You do not know this? Is that true? Don't you know, that this is happening all the time? Everywhere. Also in your country. Do you see nothing? Are you so far away of what happens in your world? Are you so blind?

Is this human, people of the world? A few do, what they want. They let people die every day. They do nothing for them. They just earn money with them. Nothing is interesting for them, than this. People are just there. Nothing worth.

The countries, in which those, who reign the world, take All. They take All, and do not care about the people. They are there. We use them, when we want it. We do not only use them for work, but for everything, we want.

Your eyes are closed. Why? Because you do not want to see. To see, and react. You do not see, and this might make you a problem. Why? Because you then also do not see, that the people, who have nothing, just have no choice, than to leave their countries.

By the way, billions of people cannot have all these things now. They even do not have enough food every day. They even do not have money, to buy something, they can live in. You do not see this. Why? Because you have no eyes to see it.

But, do you need all the other things, which you buy all the time. The products, which just do nothing for you. You buy them, and they do not help you. They just need money to be bought. Bought, and finally stored in your place, where you live.

It is not important, because it does not do anything. Anything, which makes you happy. Yes, you need food. Yes, you need a place to stay. Yes, you need a place, to stay and have a living. A living, which is good. A living, which can help you.

It is now, people of the world, that you can change. Change, what has to be changed. It is nothing, what you can loose. Loose and not have any more. You are not aware of the fact, that that, what you have, is not important.

Of the billions of people, who have nothing or close to nothing. Who are not worth to have it, because they are regarded not to be useful. Nothing, they say, who are reigning the world now. This is true. This is how they think.

You are useful, and thus you can live. Your life might be better than that of the other people, but: "it could also change." Change, when you are nomore seen to be useful. Then it could happen, that you are suddenly one of the others.

You are one of them. This means nothing. You just do not see, that you are there, to deliver, what they want. You are one of them, because they need you, to do something, they want, that it happens. Nothing else is true. You are useful.

It is not relevant for you. Why? Because you are not one of the people, who has to suffer. You are there and are lucky enough, that nothing happens to you. You are still one of the people, who is well. Well, and can live, like you want to live.

It hinders you to be. To be, and to act. To act like a human being. To act, like you are. To act, like you want to act. You are hindered to do it, because you think. This means: "you avoid being touched." This can be, because your EGO tells you: "it is not."

It is All. It is All, means: "it is All so disgusting, that nobody, who is a human being can see it, without being touched." It is All so disgusting, that you must be touched, when you see it, but you think. You think, and this hinders you. To live a life, which I wanted to live, when I came to earth. You are here now. You do not want to do, what you do. You are not loving. You see things, which you cannot see, without being touched negatively of it. You cannot see, what you see.

The change is not easy, but it is possible. Your change is possible. You can do All. You have it with you. You can do it, when you want to do it. When you decide: "I will change now. Now, and that, what hinders me, to live."

If everybody in the world would look for the change, he could go for, nothing would happen, what happens now. You, people of the world, must do this. Change your way of living. Change it. Go for it, and do, what you can do.

People of the world, you can recognize, that this is so. You can do it. Just see. See, and let this be. Let it be, that you see it, and do, what is necessary. Go for it. Go for a change. You can change. You can speak about your change.

People of the world, you have it with you. What? The capabilities to do it other. To create another world. A world of love. A world of other behaviour. A world without wars. A world without people, who are just there, to let you suffer.

You cannot wait. Why? Because you loose every day something, which is very important. You loose your humanity. You loose, what is the most important for you. You loose the courage. The courage to do something. To be. To be, what you are.

People of the world, you are not something. You are that, what is there, to change things. You are there, to go. To go, and to change, what has to be changed. It is now, that you can do it. It is not, that you should wait. You can do it now.

People of the world, you do not see this, because you think and believe. You believe, that you can do nothing against it. This is not the case. You can do a lot against it. You have all the means, to do, what is necessary, to stop all these things.

This, people of the world, is the picture. The picture, you can see, if you want to see it. It is a horrible picture. A picture, which you do not want, but allow to be. You do not want it, and go. You stand still.
But you do not see this.

You are not only robbed out, people of the world, but you are also treated in a way, which is not human. They do not see you. They are not those, who regard people important. For them people are nothing. Only something, they can use. Use for all.

People of the world, it is enough, what you have to take. It is enough taken from you. Your work is nothing worth. It is only there, to make them more rich. You do not get a share of it. You just get nothing, compared to that, what they get.

This is something, which might happen. That enough is enough. It is enough, what people have to take. It is enough, what people had to suffer because of them. Of their targets. Their crazy imagination of life. Their crazy thoughts, what people are.

Everything happens, to make sure, that they make more money. More money, and that they get, what they want. They want all the time something. Nothing is enough. They have never enough, but can also not understand, that enough is enough.

They are behind the curtain for us - people of the world. They do not want to be seen. They are only within their community. The community of the rich. The billionaires. No! They are there, when it is necessary, to make sure, that everything happens.

You are nothing, means that. You are only something, when you are there and can do something, which is in the interest for the people behind the scene. They are there. We do not really know them. They are there behind the curtain.

If they are not influential, they are nothing worth. This is the requirement, they are faced with. If you are influential, you are there. If not, you go. If not, you are nothing worth. If not, you can go, and do, what you can. Nothing anymore, what you did.

Influence is today something, which is of utmost importance. Not for you, people of the world, but for the people, who are reigning you. They want to be influential. They have to be. Why? Because they are only there to influence something.

The channels, about those they rob out the people, are so many, that nobody is able to see them. It is a pity, that our experts do not want to dig so deep, that they find them. The influence of the system on everything is really big.

So big, means: "the robbing out of the people is so big, that nobody can calculate it, without being lost from time to time." Lost, because the money taken from the people is so much, that, if you cannot see the channels, you are lost.

Let us see, what is behind the scene. Behind it is all, what happens. Behind it is all, what you cannot believe, that it could ever happen. It is something, which is really hard, to believe. It is so big, that you have problems, to understand it.

This is the picture, which we have today. The picture shows people, who rob other people out all the time, to make somebody always richer. Richer every day. This can only be seen, when you really look behind the scene. When you understand, what happens.

This has been said before already, but has to be repeated again, because it is so hard for you, to believe. To believe, that somebody could rob out somebody else, just on behalf of somebody, who is paying him for that.

They never do, what they say, that they will do. They are constantly cheating you. Not only that, but they are also robbing you out, all the time. For whom? For them? No! They are payed by somebody for that, what they do.

It is nothing new. They are such. They tell something, and believe it. No! They are just saying something. They say it, and believe only, that you will take it. Take, what they say. What they say, and what they do not do then.

They let you understand every day, that this is the case. They are there and tell you all the time, that you should leave everything to them. They are not more capable than you, but they are claiming, that they are capable. All the time, they say this.

Think other, and you are somebody else. This is hard for you to accept. It sounds too easy for you. It is something, which you have a problem, to accept. You are told all the time, that you are not good. Also, they, who are reigning you, say that.

This is true. You experience this every day. You see not, that this is not good for you. You think, that this is life. Your life. You are mistaken. Yes, you make a mistake. A big mistake, thinking this. You are just somebody, who is the victim of thinking.

People of the world, you are lost, because you do not believe in you. You cannot imagine, that you are good. You are good, but you think, that you are not good. You think it, and thus allow many other people to do with you, what they want.

People of the world, there is nothing to loose for you. Nothing to loose, means: "you loose nothing, because you lost already a lot." You lost, what you wanted to do. You do not do, what you wanted to do. You are not, what you are. You are nomore oneself.

People of the world, you are not there. You have to understand: "you are not there!!!" You are not there, and do constantly not, what you want to do. You loose oneself. You loose All. All, what you are, when you continue, to do, what you do now.

People of the world, you are not there, to do nothing of that, what you wanted to do, when you came to earth. You are there to fullfill, what you wanted. You are there to be, what you wanted. You are there to be, and to act. To act, like you wanted to act.

Nothing is nothing. Nothing is also something, which people understand. People of the world, you do nothing, what you want to do. People of the world, you are just there, doing nothing of that, what you want, and what you wanted to do, when you come to earth.

They exist. This is nothing, which can life make interesting and fullfilling. It is nothing of that, what people should have. It is nothing of that, what people are. People are there to do something. Not only something, but that, what they want to do.

Wonderful and fullfilling, life should be. It is not. It is a catastroph, what is life today. Billions of people without anything. Nothing is the right word for it. It is nothing, what they have for their life. It is only existance.
People just exist.

Life is other. Life is happiness. Life is something, which people should regard wonderful. They should see, that it can be wonderful - their life. It can be, what they want. Wonderful and fulfilling. Nothing, what is now.

It is not so difficult to understand. It is only something, which people have to see. They must see, that their life is not good. Their life is not only not good, but is not the life, they want. It is nothing of that, what they want.

To be not there - means: "people do not see, what they do." They do not see, that what they do, cannot be, what they can do. They do not see, that they are creating something, which is not, what they want. They believe. They think. They are not.

Think, and go. Think, and are. Think, and are, like they are. They are not good. They think, that this is good. They think, that, if they do, what they do, they are there. They are not there, but they think, that they are there.

They are able. They want to help. They love other people. They love and love and love. Love is, what is human. Love is, what is All. Love is, what is All, what is important. Love is. Love does not go. It is only not there, when people think.

Power over people is not, what is human. Power over people does not exist. People have no power over other people. They are not such. People are other. Human beings love. They care. They do. They help. They can do all of this.

Their thinking makes them loose everything. Their humanity first. They are nomore there. They are nomore, what they were, before they became, what they are now. People, who think, that they have power. Power over people.

They are not there, means: "they think, that they can do anything. They think, that they are special. They think, they are special, and thus can do, what they want, with other people." Nothing of that is true. They are lost. Lost in their thinking.

The power. The power. The power. It is nothing. Power does not exist. Power is nothing, which helps people. It destroys people - we have seen this. Power cannot do anything, which is good for people. People who need power are not there.

The Elite is still there, dear people of the world. They are there to do, what they always did. They fought for their money and their power. They did it, but it does not help anymore. Their power is lost. The money is there, but the power of it is gone.

The Elite hindered the people. They did not let them go. They only looked for their benefits. Nothing else was important. They are not there. They are gone. Lost their mind. Have nothing anymore left, than their money.

A world like this does not do anything. It is nothing, which the Creation wants. The Creation is there to go. To go, and to develop. To change. To be. To help people. To help people, to develop. Thus to develop All. To move All.

The Elite does not want anything for the people. For most of the people. They only want to do something for those, who are supporting them. Those, who they need, to have that, what they think, is important. Money, power and nothing else.

It is not the Elite, which makes the world go around. It is not their money, which makes the world go around. The people make the world move. People can do everything. The people of the world can do everything. Nothing, what the Elite wants to do.

Elite, what does this mean? It means nothing. It is a word, which has been invented by themselves. They think, that they are the Elite of the world. They think, that they must be that, to make the world like they think, it should be.

They do not see this. They only see, what they want to see. Those, who destroy the world. Those, who are crazy enough, to do everything, to kill millions of people every day. Those, who are the so called Elite in the world.

The big money does not help them. Why? Because it is nothing. They will lose all. Why? Because when they destroyed everything outside their island, they cannot make any money any more. This is, why they will lose all.

There are countries, which think, that they are protected. They think it, and do, what they want. They want to bring war to any place. Why? Because they think, that they can make money with it. Big money.

They thus will come, people in the rich countries. You cannot stop them. You can kill many of them. You can do this, but you will not like to do this, because it is not human. It is nothing, what human beings want to do.

You can see, people in the rich countries. It is clear. They will come. They must come. They have to come, because they are thus losing their lives. Their life is on stake. They cannot live there, where they are. They have to go.
To try it.

What do they lose, the people of the poor countries, when they go to your countries. Nothing, they lose. They are only there, in their countries, with nothing. If they get nothing in your countries, they have only the same situation than now.

People of the world, you can change this. You can believe in you. You can do it. You cannot live any longer, like you do it now. Watching in the rich countries, what happens to the rest of billions of people in the poor countries.

You are there, people of the world. You can come to a decision. You must come to a decision. It is nothing, what the very few people, who really influence everything, which happens now, can offer you. They only offer you death and dependence. Slavery.

People of the world, this you cannot assume. You cannot expect, that this world has any relevance. It is nothing, which the Creation needs. It is nothing, which helps the Creation. It is only there. Destroying everything. The nature and the people.

People of the world, do you think, that this is in order? That this can be a world, which is intended to be? That this is a world, which is worth to be? That this is a world, which can also be in the future? A world, which is a nightmare for people.

They die for nothing. For nothing. For nothing. They just die and this, because a few people have arranged circumstances, that this is happening. You are there, people of the world, and watch, what is happening.

It has to change. It has to change, what happens now. It is unbelievable, what a few people are doing every day. This has been written about many times here and everywhere, but nothing happens. Nothing happens, and millions of people die every day.

What else? There are a lot of other means, people can use, to stop their governments, to do, what they do. They can do it, the people. They are many. Many, and can have a strong voice. They can require the change.

Means are: "companies stop to produce, because they are not payed properly for their products. Companies stop to pay taxes, because they do not get anything for it, from the state. Companies allow people to stop work, without losing their jobs."

Means are: "you pay tax. Stop to pay tax. You pay fees for everything. Stop to pay fees. You are bribed. Stop to accept bribery. You are working without money. Stop to work. You are working without fair money pay. Stop to work."

It is simple to say, what has been said. Stop them. Who should stop them? What should stop them? What are the means to stop them? This, people in the world you can know. There are a lot of means, to stop them.

Stop them, means: "stop them. Let them not do anymore, what they do all the time. Let them nomore use their power. Their power is, what makes the world, like it is." Human beings have to act. To act and to change. Change this, people of the world.

People of the rich countries, wake up. You can do something. You can be there. You can stop the people, who do nothing else, than let other people suffer. You can stop them. This is your responsibility. You can stop them.

It is the money, which makes you think, that you are not touchable. It is the money, which makes you think, that you can do everything. It is the money, which is there, but does nothing for all the people, who have nothing.
Nothing, except their life.

This is not good, people of the wealthy countries. It is not good, that you just watch what happens, and not react. Do nothing, to make your governments changing, what they do. You sleep comfortably, but be aware, that this could change.

You, the wealthy people of the world, think. You think you are safe. Safe, and with your money you can do everything. You see some signs, that there are things happening, which you do not want, but you say: "as long as I am not touched, it is good."

You think so. You think, in your world it cannot happen, what happens to billions of people in other countries. You feel secure, that this is true. You cannot imagine, that it could be other. You refuse any thought, that it could be other.

This is the problem, people of the world. Your problem is, that you think. That you think, that you can keep yourself outside of what happens. You think, that you will not be touched by all the nasty things, which are happening.

To think like that is like saying: "I am not there. I cannot contribute to the life of other people. I cannot see, that billions of people are suffering. I cannot see, that they are brutally treated. That they are murdered. That they are not treated well."

They are thinking, that nothing will happen to them. That nothing can happen, which will change their lives. That nothing can happen, which happens, because they do nothing.

This might be wrong. This might be a mistake of them, to think like that.

Yes, I agree. I do nothing, to make understand, that I do not agree. I am just there, and go further with what I am doing. The rest of the world is nothing, which touches me too much. It is, like it is. It cannot be changed by me, is, what people think.

People of the world, this is true. This is the world, like it is now. This is the world, you all accept to be, as it is. This is the world you also support with your silence. With your contribution. With your - yes, I agree.

There is nothing they could say. Why? Because they have nothing to contribute. They have neither money nor capabilities developed, which they can use to contribute. They have no chance, to do this. They are just there to do, what somebody wants them to do.

What should they say? What should they say to the Creation, when it says: "what have you done, to let me go further? What have you done, to give me something, which could help me, to move further? What is your contribution to the Creation?"

Their life has nothing to offer. Nothing, which is good. Nothing, which can be regarded as human. Human in the sense, that it helps the people. Human in the sense, that it does something for the people. They are just existing. Billions of people.

The people are there. They see. They see, what happens to many people in the world. Not to many, but to the largest group of people in the world. They are poor. So poor, that they cannot imagine, how poor they are.

Rich is the person, who is constantly pressing me with something. Rich and brutal. Rich and anything, which is not good. Which is not imaginable. Which is not imaginable for the so called wealthy people in the world.

You ask yourself, what is the Creation? You ask yourself, what can I do, I, who is constantly under pressure from somebody, who is very powerful.

This, or, who is so rich, that he can do everything with me.

It is not a life, which is worth living. It is not a life, which is a life, you decided to live, when you came to earth. This is not a life, which is good.
This is not a life, which can help the Creation.

People of the world, wake up. It is no life, what you are living. It is a form of slavery you live. All the time. All the time, till the end of your life. Do you see that? Can you accept that. That you are not living a life, which can make you happy.

It is all obvious. It is all a nightmare. It is all something, which a normal person cannot regard possible, but it is possible. It is possible, because so many people are believing, that this is life. This is no life.
This cannot be life.

Of course that is not the case. They are not important. They only think, that they are important. Important, because they have a lot of money, which they got from the people, who are working all the time, to deliver the money, they get from them.

Their pockets are that, what they are constantly addressing. They get never enough for their pockets. They never stand still. They are crazy enough to believe, that their pockets are the most important thing in the world.

A few people influence the people of the world. This they do with means, which are not only unhuman but are criminal. They do it by all means, that, what they want to achieve. What do they want? Nothing for the people, but for their pockets.

It is a concept of nothing. What does that mean? It is thus, because people cannot live. Live, and do, what they want. They are constantly said, to do this. They are influenced by means, which are not human but are unhuman.

This is a concept which is just nothing. A few people have All. The rest of the world is working for their nothing.

The nothing does not help the people. It is only there to make money.
Money, which is worth nothing.

It is a pity. The world is there. The earth and the nature is there. People are there. They do not, what they can do. They are just there. Doing nothing, which is worth doing. They work all the time. They have no time anymore, to live.

See what happens. Everyone is unhappy. Everyone cannot do, what he, she wants to do. Everyone is only there. Nothing is changing. Only money is king. Nobody is addressing this. They are all caught in the moneychain.

A concept, which does not see the people in the middle of All, is nothing. The people, who reign us, have only one thing in the middle. This is money. Nothing else. They are not there. They lost everything. Nothing is left.

It is such: "people are the most important." Nothing is worth more, than people. Nothing is more worth, than people, because the earth is there, for the people. The people are that, what can be. They can be All. All, and are All.

The new world is there. It is already there. It can be, because the world, which they wanted to create, was worth nothing. It was not worth anything, because they did not see. See, what they did to the people.

It is a new world. People are saying no. It is the new world, which they anxiously wanted to avoid. Those, who have steadily told us, what we have to do. You can see, what happens. They are more and more, who say no to them.

Here you are. You are now that, what you are. A human being, who is no more following just because he is said to follow. He stands there. Ready to leave. To leave those, who are there, to tell them, what they should do.

Somebody can tell you: "you make a mistake. You are not allowed to do. You are my underdog." Let him or her say this. Do, what you want. They are not relevant anymore for you. They can go. You are.

Nothing can stop you. It is, as it is. You are there. You are there and go. You do not be anymore like somebody, who is nothing. You are somebody, who can be, and is. You are, and you say: "I am here. It is good, that I am here."

You are nomore nobody. You are a person. A human being, who is there. There, and can do. A human being, who is present and has to say something. Nothing can stop you anymore. No fear. No dependence. Nothing!!!

It is that. It is that, what makes you other. It makes you other, means: "you are then present." People recognize, that you are present. You cannot be anymore a man or a woman, who is just there, and say yes to everything told.

You are oneself. Then you are. Then you can go. Then you can be. Then you do not have fear. Then you do not fear those, who tell you: "you must do. You have to do." Then you say: "I am here. I do not want to do, what you tell me."

You are not, because you are not oneself. You are not oneself, and then you think. You think, and you do not hear anything. You hear not, what you can hear. You hear not your voice. The voice. The voice, which is there.

It is All. All is dependent on you. On your presence. You can be present. You can be, what you are. You are, when you do, what you want. You cannot do, what other people are telling you, because then, you are not.

People of the world, this can be. You are. You can be. You cannot be, like you are. You are then not there. You cannot do, what other people are telling you to do. You can do, what you want. Then you are happy.

It is the world. The world, which was nothing, which is now everything. It is a world, which can be. It is a world for people. It is a world, which can be. It is a world, in which people can be. Do what they want. Be, like they are. Act.

To learn to live, you are here on earth. You can do this. You are together with many other people. They can help. Ask for help. Do, what you want. Ask for help, if you do not know, what to do. Ask, and say thank you, when you got help.

What can you do? It is also simple. You can go. Go with the Universe. Change, what has to be changed. Change, what you can change. Be good with you. Be patient with you. Be All, but not impatient with you. You are here on earth to learn.

Oneself lost is difficult. Oneself lost is, as if you would loose All. It is nothing, what is left, when you loose oneself. This is the most difficult situation, a human being can be in. It is nomore life. It is only existing, but not life.

It is a world, which helps people to go. To go, and to be. To be, and to do. To do, what they want. They came. They came to earth to do something. They came to do, what they wanted to do. They did not do, what they wanted. They lost oneself.

A world, which is moving, and in which people are happy. Happy to go. Happy and satisfied. They do, what they want. They are. They are not anymore, like they were. They are ready to go. No must anymore. The must went with the ones, which told them, you must.

It is as simple, as that. It is simple, and they are there. They are there, means: "they are together. They join forces. They cooperate." There is nothing anymore, which hinders them. It is a world, which is moving.

A lot they can do. A lot is what? It is All. They can do All. All, what they have with them. They have together a lot with them. They are All. Means: "they have their talents, and together they can do All." All the talents can do All. It is simple.

How is it? How is it, after the Universe moved. It is other. It is such, that people play the role, which is their role. They are there. They can be. They can do. They are. They are there and do, what they want. They can do a lot. They have talents.

Those, who did nothing for this, they are nomore there. They lost everything. They had anyhow nothing, but money. Money was their God. It is nomore there. It was. It is only money. Money, which can play a role, but cannot be, what they thought.

It is good. It is good, that you see, people of the world, that the Universe can do. Do, and go. Do, and move. Do, and be. Do, and be, and move, what has to be moved. It is All. All has to move. All is also you. You have also to move. To move further.

Believe, people of the world, that it can change. That the change will happen. That the change is there. It is there, and can do something. Something, which is necessary, because the things, they did - the very few people - were nothing.

People of the world, this is now. This can be now. It is now. It is moving. The Universe is moving. Moving to help you. Moving to go. Moving to go, and create, what is necessary to create. You can see. You see it, and can believe.

People of the world, do believe. Do believe, and go. It is the world, which you deserve. It is the world, which you can help to build. To expand. To create new. New, what can be new and helpful to other people. You can go now.

What is now? Nothing anymore of the systems. Nothing anymore of all the things, which made so many people in the world suffer. They are free now. Free from all that, what a very few people created and initiated. Nothing is there anymore of them.

The systems they created were only there to rob out people. To do it, and never stop to do it. They could do it, because there were many of people, who supported them. Also government authorities supported them. They were all corrupt. Bribery helped.

The money was the only thing, which kept them in power. No friends. Only sufferings of billions of people they created. They were crazy. They are out. They cannot do anything anymore. All the systems are broken. Nobody does something for them anymore.

The people behind them are nomore there, means: "they cannot do anymore, what they did." It is simple. It is not only simple, but it is also true. They loose all the money. The money goes. With the money goes their power. With the money goes everything.

It is out, means: "those, who are there to keep the system going, are nomore able to do this. They loose." They loose, what helped them. They loose All, what helped them. The people behind them, they loose. They are lost. Nomore there.

They were just all the time speaking. Nothing important, but they spoke all the time. It is nomore necessary. They are nomore important. Their God went. The money they played with all the time, does not do anything anymore. It is out.

People of the world, it changes. It changes, what has to change. It is nomore possible, that a system is there, which is nothing. Nothing, which can help people. It is nothing, what they created. Those, who claimed, that they are something.

To you, who earned All. Who worked every day. Who was there. Who had to overcome all the sufferings. Who was robbed out. Who was suffering and could not do anything, what he wanted to do. It is out. No sense behind it. It is now. It can be now. It is. It can be, and is, because there is nothing, which helps. Nothing helps, what a very few people did. They did nothing for the people. People of the world, they had All and did not give anything to you.

Now you see. You see, and can see, what happens. You can see what happens, when the Universe moves. It moves further. It has nothing to loose. It looses nothing, becaus it is All. It can do All. It is All.
The Creation asks for movement.

People of the world, it is not possible, that this goes on. The suffering of people worldwide. It is out. It is nothing. It does not make any sense. There are a very few people, who think. They think crazy things. They have nothing for the people to give.

It is not possible, that you are stolen your right to live. That you are more or less a slave. That you are nothing. That you are influenced. That you are robbed out. That you are a human being, who is seen nothing. You can go.
Go, and do.

This, dear people of the world, is. This can be. That you get, what you want. That you have, what you need. That it is nomore possible, that you are what you are. A human being, without rights. Rights, which every human being have. The right to live. To be.

It is. It is, what it is. It is, and can be. It is, and will be. It will be, and can be, because you are important. People of the world, you are important. You cannot believe that. You will see. You will see, that you are important.
Everyone of you.

The Creation is. This means: "you as a part of the Creation are." You are, and can be. It is not possible, that you will never be. It is not possible, because you are a part of the Creation. The Universe moves also with you.
You and All. All, what is.

People of the world, you can accept, that this is true. The Universe is there. It has to move. It moves further. All can happen. All is possible. All is, because it has to be. The Creation is there. It is. It can be.

It is possible. It is not a story. It is not something, which is not possible, but is written here. It is possible. It is not only possible, but it can happen. It happens, because the Universe has no alternative. It has to move.
It moves further.

It is not true, say the people of the world. This is not possible, say they. They cannot imagine, that this can happen. They cannot see, how this could happen, ever. They cannot believe. They are not able to believe, that their suffering could ever end.

It is out, what they wanted. It cannot happen. It can't happen, that people are ruining the lives of billions of people. They did it. They had no scruples to do it. They were able to do it. It is over. Over and out. It is over, and cannot be anymore.

They lost their mind, and they cannot see. They are blind. They are blind for all the things, which happen. They cannot see anything anymore. Their life is nomore there. Their money is nomore working. It is out.

It is another world, people of the world, which can be. Nothing like that, what we see today. Nothing of that, what they wanted. Nothing of that, what they not only wanted, but were trying to do. Nothing anymore of them.
Those, who lost their mind.

This money can go. It is nothing worth. Worth are the people. The people can do. The people can go. The people can help. Help each other. Can form communities, which are good. Communities, in which people can live.
Communities, in which people can be.

It is hard to believe, but it is like that. They created a scientific world of money. Money, which bought companies. Money, which bought houses. Money, which bought everything. Also people. People, who did, what they wanted.

Nothing is, what they are saying. Nothing is, what they are doing. Nothing is, what they created. People of the world, you lose nothing, when they are no more there. They, and their money, which is nothing worth.

The world is not there, which they have created. It is a scientific world. A world of money. Money, which does not do anything. It is not worth the amount, which is shown on the papers of money. They have created something, which is only nothing.

It cannot be - this world. It is a world, which is scientific. It is nothing, because it does not do anything for the people. It is nothing, because those, who are creating this scientific world, cannot see. They only see something, which is nothing.

What can this be? A life, which matters? A life, which is important? A life, which can do something? This cannot be. It is a world, which is nothing. A world, which is not only nothing, but cannot be.

This is their life. Nothing important. It is only a game. A game, which is played. Which is a play, that is directed by other people. People, who are not there. There to show. They are behind the curtain. They order. They say.

Their importance is directly connected to something. It is connected to their delivery. Deliver money. Money, money, money. Nothing else is their destiny. Deliver. You are not delivering? Then go. No importance anymore.

Their community is very close. No! They are not friends. They are not partners. They are only bosses. Bosses of this and that. They show up. They speak. They are there to say something. They play importance. They are not important, but they can show it.

They must show all the time. Their importance. Their money and their wealth. They are no more living. Their life is a show. They meet. They think, they are important. This is their life. Nothing, but within their community they think so.

They cannot be happy. They think, that they are happy, but it is not the case.

They lost everything. They are paid for that loss. They lost the contact to the people. They are only within their community. Do not be. They are only together to show.

They are not there. They cannot be there. They are lost in their world. Their world, which is nothing. It is a world, which has only one thing, which they regard important: "money." Money is their God. They have nothing else, which makes them go.

It is unbelievable, that human beings can be like that. They lost any humanity. Paid for let people suffer. Paid for let people not only suffer, but leave them alone. Paid for, and do nothing else, than telling people, that they have to do.

We deliver. The consequences of that, is not our problem. We do not want to think about this. We have no voice. We are only there to deliver, what is told to us. We show up. We are, who we are. Only there to make sure, that happens, what we are told.

We are machines. Machines who function. No doubt is allowed. We have to function. It is our life. Our life is there. We have money. We have jobs. We are allowed to do. We can do, but we have to deliver. To do and to deliver, what is necessary.

Scruples is something, we cannot have. We have too much to loose. We have nothing to say. We are just there, to execute, what we are told. Machines, who are there to show up and to do. Nothing is, what can stop us to do this.

Enough money, we must get. For that we do everything. We give up to help people. As long as we get enough money, we behave like we are told. We are those, who execute, what we are told. We do, what we are told, and do it without any scruples.

They only care for themselves. Nothing is anymore important for them, than to care for that, what they think, is the most important.

The most important is for them, that they have the job and money. Money, which they get enough.

They should do everything for the people. They should be there for people.

They should be relevant. Relevant means: "they should care for their people. For the people, and not for them only." This is their major problem: "they only care for themselves.

It is their life. Show. Nothing else than show. Show, and that, what they regard important. Show, that they are something. It is not what they are, but they think, that it is important, to show, that they can do. Do something, nothing what they should do.

Bosses do nothing, which is relevant. They pose. They show. They think, that they have to show. To show something, to be. They are not there, but they think, that they have to show all the time something.

Bosses, these are people, who are not good. They do not know. They do not see. They only think. They think, that they are something. Something, which make them do, what they do. They do nothing for the people. They are just there. There for nothing.

People who order. They are there. They think. They are no more there. They lost their humanity. They do not see. They only think. They think, that it is their right, to order. To order and to play bosses.

This is not easy for you, to accept. You have experiences. This is true. You have experiences, which prove you, that this is not possible. People, who are helping you. Who you can ask for help. You experienced, that there are only those, who order.

Ask for help, and you will get. Ask for help, and you can do. Ask for help, people of the world, and you will see. You will see, that help is there. You can get help, but you must ask for it. It is easy. Human beings want to help. They love.

You experience that, when you start to do. When you see, and ask for help. When you are asked, if you need help. When somebody is there, and ask you, do you need help, then something is happening. You are together. You can do together.

Tell these people, I do not want to do, what you want. Tell them, I do not need your help. Help comes from people, who ask you, if they can help, or, who you see, that they can help you. You can see it. You will get help.

People of the world, this is nothing. This cannot be true. You are a human being, and thus able to do, what you want. You do not need other people to tell you. You can do it on your own. You can take help, if you want, but not, if somebody tells you that.

You think. You do this, and you cannot do, what you want. Why? Because you think, that those, who tell you, that you cannot do, what you want, are right. That you are the one, who does not know. Who is there, but is only there, to do, what other people say.

People of the world, this is no life. Do not believe, that this is life. No life is, when you do not do, what you want. When you are only living, without any hope. Without the hope, that something will ever change. Nothing changes without you.

They go. They do not go, like they want. They believe. They believe, and cannot see. They do not see, that their way is not good. It is a way of suffer. It is a way of nothing. Nothing to live. Nothing to have. Nothing to enjoy. Nothing to be.

Never allow, that your life is without joy - people of the world. It is not good for you. But there are billions of people, who have no joy. This is true. This is, because they follow all the time those, who are telling them: "you cannot have joy."

It is your life, people of the world, but you should have joy. You should have joy to live and to do. You do without joy, then you are not on a good way. Your way is then: "you must do. You have to. You cannot deny to do."

Joy can be, if people do, what they want. When they are oneself. When they cannot stop doing, because they do something, which they want to do. They do it, and have fun. They have fun and go. They can do everything.

Full is a human being, when he is happy. Then he is full of joy. Joy is, what is the most important in life. If human beings have joy, they live. They live and can be. They are happy, and good. Good means: "they are full.
Full of joy to live."

Happy are people, who are together with other people. Who share their lifes. Who love people. Who can go together. Who want to go together, because they know, that this makes them happy. They are then full.

It is your decision, people of the world, if you want all of this. It is your decision, if you want to be alone. Alone, without other people. You are the only one, who can decide that. You can do it,
but you are then nomore happy.

It does not do them any good, means: "they are just not happy." Happy, and satisfied, with what they do. They are not only unsatisfied, but also start to be nasty. They start to be people, who do not want to share. To be with other people anymore.

No way is bad. No way can be seen as bad. There is no bad way. It is only thus, that people choose to go a way, which makes them not happy and satisfied. They learn something. They do something, which does not do them any good. They are not satisfied.

It is good. It is good, that people see. They can see. They do not see. They do not see, that the way they take, is not good. Not good is a way, when the people are not happy and satisfied. When they must. When they have to.
When they think, they have to.

A good way. What is this? A good way is that, what helps the people to go further. To move. To be. To live a life, which makes them happy and satisfied. There are good ways, which can be taken by the people.
A lot of them are there.

Special people. This is not possible. Human beings are not special. They are good. Everyone is good. Good, and can stay good, or loose the way. The way, he wants to go, but he thinks, that he should go another way. One, which does not lead him on a good way.

Bosses think. They think, they should not ask. They think, they are special. No special human beings are there. They are all human beings. They have a different talent. Yes, that can be, but nothing of that is special.

Human beings do not order. They are asking. They do not want to play boss. They want to be together. Help. Help each other. Not that they do everything for other people without anything. No! They are asked for something and can do it.

People of the world, you must say no to those, who are telling you: "do this!" They are not good. They do not ask. They just order. They think. They think, they can order. They cannot do this. They are not your bosses. They are human beings like you.

Never give up. Never give up, people of the world, to live the life, which you want to live. It is your decision. It can be. It can be, that you live the life, you want, but you have to say: "I want to do. I will do."

Life must make sense. Life is good. Life can be good. Life is then good, when it is lived. Lived is life, when people are doing what they want. Live does become difficult, when people start to do, what other people want.
And not, what they want.

Life is All. Life cannot be, when a human being does exist, but does not live. Life is then not there. There, means: "it cannot help." It does not help anyone. Neither the human being itself, nor other people. It is senseless, the life.

You are dead, means: "you live, but you do not do anymore, what you can do." You are dead, means further: "you are nomore existing as the human being you are." Means further: "you are living, but it is no life."

To give up oneself, this is something, which can be a desaster for people. It is a desaster, because this is like not to live. Means: "you do not live anymore. You are there, but you are dead."

You, people of the world, could stop it. You could do something for it. You could say no. You could stick to honesty. You could stick to something, which is important for every society. This is something, which never should go. That people give up oneself.

The world's economy is today nomore imaginable without bribery. Nothing goes without it. We have created a cancer of bribery. The cancer is widespread. It is everywhere. Everywhere is bribery, at all levels of the society. Nothing works anymore without.

We, people of the world, allow this. We accept this. We are not realizing, that because of this behaviour, we all suffer. Why? Because it increases the cost of everything dramatically. It is unbelievable, what bribery costs the world economy.

Important is, that people are honest. That people are not only honest, but also obey rules. Rules, which are there. Which should be a given. How can it be, that the rules are nomore lived too? This can be, when we people allow this.

Bribery is there, people of the world, because we all allow it. We accept, that bribery can take place. This is true. This can be, when people are going too far. Too far away from that, what is important.

The bribery, who allows that? The governments? The companies? Who is it, who makes the bribery something, which is common today? Which is normal. Which can be, and nobody is there, to hinder it. Bribery everywhere.

Corruption is everywhere. We know it. There are statistics about it. The richest countries are suffering under the corruption. Why? Because it costs us - the people - a lot more, what we do, when we have to finance also the bribery.

They never had scruples to rob out the people. They did it, and have steadily continued to do it. Their systems work like that. They do not wait. They take. They are the cancer in the economy. Corruption is the cancer. They buy everybody.

People of the world, this is true. It is such, that they rob out their own citizens. They do it consequently. They have installed a lot of systems to do it. They take everything. They are nomore willing to wait. They do it without any scruples.

People of the world, this is true. You can see it. You can hear it. Ask the people around you. They force them every day. Never enough delivered. No tax is high enough. No fee is high enough. Never have they enough money available.

People of the world, you can see that. Your country is suffering. All the people are suffering. They are asked to contribute. Always more. Everyday more. They are threatend. They are forced. They have hardly enough anymore to live a life, which they want.

People of the world, this is also, what is going on in your country. They have influence. They have power. They ask for money. They ask for assistance. The assistance to rob out all the people. This is, what is also in your country the case.

People of the world, this is their world. The world of a very few people on earth. They are going to destroy the earth. They are going to destroy the life of billions of people. See that, people of the world. This is it. Nothing else.

People of the world, this is their world. The world of machines. They thus only want machines. They are machines, and they think in terms of machines. They cannot do anything anymore, they are thinking like that. They cannot control their thinking anymore.

It is, that they switched to machines. Machines in moneyproduction. They have no other thought. They are machines, means: "they function. Their functionality is measured in money. They can do nothing else. They are nomore there."

It is not that, what should be written here. It is too disgusting, what they do. We know it. We cannot repeat it. We cannot speak about it. We do not want, to speak about it. It is no humanity. It has nothing to do with humanity and human beings.

It is their life, people of the world. Do you think, that this should be yours? No! You cannot think that. You are not able to think that. Why? Because you cannot do, what they do. You cannot even imagine, what they do for the money they earn.

People of the world, this is it, what keeps them alive. They are not many. They have no friends. They have nothing, which makes life attractive. They just have money. They do everything for it. They do it, and are never satisfied.

People of the world, this is true. They are nomore there. They lost their mind. They have only their money left, which let them feel, that they are living. They live for the money, and that, what is connected to it. The power to buy.

People of the world, you have to accept, that their thoughts are not that of a human being. They lost their mind, therefore they are not able anymore to have some sort of humanity. They have nothing anymore, than their money.

People of the world, are you aware of that, that you are nothing for them? Nothing for them, and thus only something, which can be, when they want.

They do not want you. They only want you, when you buy and do,
what they want.

People of the world, you are not there, to just be there. This cannot be. This does not make sense. This can only be a thought. A thought of people, who are crazy enough, to think, that people are just nothing. Nothing and there.

People of the world, you are there to do something. You are there to be. You are there to create and to do something, which brings the Creation further.

You can help. You are there to help the Universe to go.

To go, and help the Creation.

Why are they there? A mistake? An accident? A crazy game of the Creation?

Something, which should happen, to show something? This cannot be. It is nothing, which can be assumed. This is in no way that, what is possible.

It is easy. There are billions of people on earth. They are poor. Most of them.

Poor, and have no life. No life, means: "they have nothing to live. They live, but cannot do. They cannot be." They are just there. Why?

This is possible. This can be. This is, what they want. Is it possible? Can this be? It can be, when the people of the world are not willing to change. To change, what is. To take their responsibility for the earth. For their families.

For other people.

People of the world, you should see this. You should be aware of this. You should know this. You should not only be there and wait. Wait, til they

achieve, what they want to achieve. All people in the world
dependent on them.

They have an additional target. It is the real dangerous target they have. They want to make the people completely dependent. Dependent, and so dependent, that they cannot do anything anymore, without them and their approval.

They have installed a system, which is targetted to take All from the people. People of the world, you should recognize, that their system does this. They have only one target: "take all the money from the people." This is their only target!!!

Because they do not stop. They ask you to give All. All means: "your work; your family; your house; your salary; all what you have." They never let you and the members of the family go. They are there. They do with you, what they want.

Credit makes you more dependent. They get you. They get you fully in their hands. They never let you go again. They are there. Offer credit. Charge you with interest and fees. They take all from you. You cannot do anything anymore. Why?

They take your money. They do it, and you get dependent. They do something else. They constantly tell you, buy more. Buy, and spend money. They also tell you: "you do not need your money, because you can get a credit." Credit is the most dangerous.

You spend money. You spend it, and spend it, and spend it. You do it. You spend money, and get nothing for it. You spend it, and become dependent. Dependent on that, what you buy. They all the time tell you: "buy." Why? Because it brings them your money.

Satisfied is something else. Satisfied means: "you are. You can be. You can do." Then you are satisfied. Then you can be happy. This is life. Life has nothing to do with consumption. With buying. With storing goods. With spending money.

People of the world, you can see. You are just consuming things. Things, which do nothing for you. That is true. Look at it. You consume something. What does it do with you? It satisfies you? No! It does nothing. You are not satisfied with it.

All is what? All is your life. Your life is important. Your life is All. Your life cannot be. Your life cannot be, if you continue like you live. You do not live. You are just there. Nothing is that. This is no life. You consume and are there.

This, people of the world, can be. It is important, that you understand, that this is the only way, you can do something for you. You can do it. You will not lose anything. You will gain All. You will gain, what you never expected. All.

This, people of the world, you can do. You can do it, and thus give a signal. The signal is: "we do not want anymore to do, what you want. We are no more there for you." This is the message to them. To those, who took all from you.

What can you do, people of the world? It is not so complicated, that you cannot understand what is necessary now. You have just to say no! No!!! No!!! Say no to anything, they are telling you. They do not know anymore, what is.

What you are is important. You are, and can be. You want to be. You want to be oneself. Oneself is important. Oneself can do All. It can do All means: "it can give you, what you want. You want to do. You want to do, what you can do.

It is change. The change can be, when you people of the world are there. Please, people of the world, accept change. It is something which is life. It is part of your life. You change and go. You are. You can be. You can be, what you are.

The change is. Change is something, you, people of the world, do not like very much. You like to be. To be, and not to change. This you can learn. Learn to change. People of the world, this is life. Life is change. You can do it.

People of the world, the Universe must move. It cannot not move. It is there to move. You are there, to move. You can do it. It is possible. Possible for you, to move. What does this mean? It is easy to understand. There has to be a change.

It helps you, what does this mean? It means, that the Universe is there to make sure, that All can be. All can be, what helps the Creation to move. The Creation cannot move, if parts of the Universe do not move. This can be, but it is not possible.

The Universe moves. It can move All. It is. It is there, and can move All, means: "it is All, and thus can move All." You people of the world are moved also by the Universe. The Universe is. It is, and it is that, what also helps you.

Human beings are thus a part of the Universe. Every human being is a part of the Universe. Nobody is not included. Nobody can go, without the Universe. Nobody does something, without the Universe. It is All. All can go, when the Universe moves.

The Universe. What is the Universe? It is All. It is, what keeps together All. All, what is. All what is, is the Universe. It is All, and can do All. It moves All. It is All. It can do everything. It is also that, which moves the earth and the human beings.

The Creation is there. It can be. It moves. It will never stop moving. It is All. All is moving. All the time moving. Nothing can stop the movement of the Universe. This is not possible. It is only possible, that something hinders the Universe to move.

It can be, because the Creation learns. Every human being on earth is learning. Learning something, which helps the Creation to move. To move, and be. To move, and create further. To move, and be, and move further, what is there. Created.

Millions of people on earth are thinking like this, and do not believe, that they can contribute anything. This is not true. Every human being who is there on earth, contributes to the Creation. This is so. Why?

Because it can be.

My life is nothing. I cannot do anything. I am not important. I have no influence. I am here, but it is nothing, what I can contribute. My life is not something which counts. This is the thinking of millions of people on earth.

Go means: "it moves. It is. It can be. It creates. It goes further. It is." It is All. All is, what is important. All contributes to the Creation. You also. You, all the people on earth, are contributing to the Creation. They are there, to contribute.

It is. It is and can be, that God was it. Why? Because All is there, and lives. Name it God; name it Universe; name it, what you want, All is there, and lives. Lives because it can live. This is important. It can live and go. It can do All.

Created by whom, is the question. You and all the human beings of the world are there, and are there because "something" has created them. You do not know, what it was. It was God, say many people on earth. It was God, so why should it not be like this?

Was it what, people of the world, who gave you the life? What can you think, that it could be? What? You are there. This is a fact. What else is there?
Many things. They all are there. Created by whom?

God gave it to you. The life. This is maybe something, which you doubt. Who is God, to give me the life? Can this be? Is it the case, that you doubt this?
Then ask yourself: "what is it then, who created myself? Was it what?"

God can be. You can be. Created by God, you can do All you want. You can do what you want, and your talents will help you, to do it. It is your life. Your life is important. Your life is given to you by God. God gave it to you, to do, what you can do.

God is LOVE. LOVE is All. You are a human being, and you are with God. You, and any human being on earth are with God. You can be with God. God is with you. God wants to be with you. God wants to be with every human being on this earth.

Why should God then separate between people? Why should God say: "I am not here for you. You are not selected by me to be one, I want to speak with." You cannot believe, that God could do this. Is this true? You cannot believe this!!!

Why should God do this? God, who claims, that HE is LOVE. LOVE means: "All." All means: "All." All, what God created, HE loves. You are also created by God. You are a human being. Created by God. Can you believe this? You are created by God. Loved by God.

Is God there? You think. Other people think. They say: "we know, God is there." They say also: "God is there, but we are the ones, who can speak with him. We are the ones, who are with him. We, only we, are selected to be with him."

You think, and thus you are not able to accept, that God is there. You think, it is not possible, that God is there. You might fall into a trap. The trap is: "you think, and your thoughts are telling you: "there is no God for you." People of the world, why then is it so difficult for you to believe, that he is not also in you? With you? On the way with you? Do you think, people of the world? Yes, this is the reason, why you cannot believe.

God is there. We can see it. HE is everywhere. Everywhere means: "in any life. In any animal. In any flower. In any tree. In any leaf. In any part. In anything, we can see." God is there, and does. HE can do All. It is All his Creation.

For me, God is not there, but for other people. People who claim, that they are connected with God. That they know, what God wants. Is this true? Can God be like that? God, who is LOVE. God, who does All. God, for whom everything is possible.

People of the world, you are not there. There means: "you stopped asking God for help." You cannot believe, that God wants to help. This is your problem. This can be. It can be, when you think, God is not there for me.

God is there, people of the world. HE is there, and can help you. You can ask for help. You can do this. It is normal. It can be. God helps you. Then thank God for the help. This is, what you would do to every friend of you.

It is your earth, people of the world. It is God's Creation, people of the world. You can regard it important. You can appreciate it. You can do all of this. You can also ask God to help you.

It is not so, people of the world, that you cannot do anything for other people. It is such, that you can do all the time something for other people. You can also ask God for help, for other people. Do it, and see. Do it, and never stop to do it.

What can you do? Did you ever do something, to protect another human being? Did you ever help another human being? Are you there, when somebody is hurt? Are you a human being, who does not allow, that another human being is hurt? Is that the case?

People of the world, it is your earth. It is your home. It is your life. It is all yours. You see. You do not see. You act. You do not act. You are. What are you? Are you there? Are you a human being, who cannot see, what is? Are you there, and do something?

You act, people of the world, when you see, what is? Do you see, what is? Do you act, when you see, that other people suffer? Suffer and are nomore able to act. To act, and to do, what they want. Terrible, people of the world, terrible is that.

To be on earth is not enough. To be on earth means: "you are there. You are there, and go. You are there, and be. You are there, and act." Act means: "you do, what you can do. You do, what you can do, and have all with you, to do it."

Happy is also not, when human beings do not do, what they want. When they just are there. Living without any hope. Hope, that they can ever do, what they want. Ever be, what they are. Ever be, and do, what they are there for on earth.

Human beings need sense in their life. It is, what is most important for being happy. If people do not have sense in their life, they are not happy.

Happy is, what should be. Life is good, when human beings are happy. Sense is. Sense is, and is not, when human beings are not doing, what they want. They can live without sense. This is possible, but it is not good. It is not good, when human beings do not have sense in their life.

Senseless life is horrible.

They order. This is something, which people have learned. They order, and thus they do. They should not do that. They should ask. Ask, why they should do something, which does not make sense. Sense is important.

People should more look for the sense.

We tell them also, that they have to do. To do, what institutions, people created, tell them. We tell the people also, that they have to do, what they are telling them. They do not tell, but they order.

We tell people, that the world is round. We tell them, what the most important thing in life is. We tell them, that people have to work. That work is important. That all is dependent on the job, somebody has. We tell this the people, all the time.

We have thousands of institutions, who are teaching people something. This is true. We have collected knowledge. We want to give this knowledge to the people. We do it, and it can do something. Does it do anything for that, what people must know?

People do not regard it important to search for their talents. They just do something. Nothing, what makes them happy. They are just doing something, and thus do not find, what is in them. They are somebody, who is there, but does not do, what he wants to do.

People go. They go, when they are using, what they have with them. They are then moving. Moving forward. They are also those, who are then satisfied. They found, what was there. They had it already with them. They just had to find, what they have with them.

Talents are there. It is that, what every human being has with him. It is true. It is clear. It is something, which can be proven. Proven by a lot of people in the world, who tried to find their talents. They found them, and could go.

You are able. You can do. You have talents. You can do with your talents, what you want. It will be clear, when you start to look for your talents. When you stop just doing something. When you start to search for your talents. When you want to find them.

He understands that. It is, what he learned. Learned and cannot get rid of it. It is his destiny, to be like that. One, who does not understand. You believe this? That it is like that. That you do not understand. That you are not able.

They do it, because it seems to be, that they do not know. They know, but they do not believe, that they know. Therefore they accept, what they are told. Go, and do. Do, what you are told. You are not able. You are one, who does not understand.

The other people. Who is that? They seem to be those, who know something. It is true. They might know something, but this must not be relevant. Relevant for that, what people want to do. They do something, which they do not want to do, but do it.

It can be, that people are not happy. This is something, which is today widespread. People are not, what they are. They think. They do. They have to. They are not oneself. They are, what they are told to be. To be, like other people tell them.

Happy is. Happy is not something, but is, what life makes good. Life is good, when people are happy. Life is good, when people see. See, and are happy about that, what they can see. What they have made. What they have created. What they are.

You are there means: "you are there to do something for you and other human beings." You are there, and you can do this with your talents. Your talents are widespread. You can do a lot of things. You do them, and you are happy.

You be. You be, means: "you are a human being." As a human being, you are there to do something. This something is important. It is important, because it gives you something. This is, what you be means. You can do something with what you have with you.

What does this mean? The heart is there. The heart is there, means: "it is. It can be. It can do." This is your heart. Your heart is, means: "it is there, and can help you, to stay alive. It is there, and does everything that you can be."

You can see, what your heart does. It does All. You can rely on your heart. It is there all the time. It works for you. It works all the time for you. It works, and does this, without asking you. It is there. It is all the time there for you.

It works all the time for you, and more. It gives you something. It gives you, what you definitely need most. It gives you love. Love is, what it gives you. Love is, what the heart gives you all the time. It gives you love, and you can see it.

It is All, means: "you cannot live without your heart." This is true. This is a fact. You cannot live without your heart, and you do, as if it is only a pump. Just functioning. No, it does not only function. It works all the time for you.

People of the world, are you aware of this? Are you aware, that the heart is there, to help you. To help you to go. To keep your body active. To do everything, which is necessary to keep you alive. It helps you not only with that. It is All.

The heart, dear people of the world, is not a pump. It is the center. It is All. It can do All, because it does All. All, what can be regarded love. It loves you, people of the world. It does All necessary, to keep you alive.

The heart, dear people of the world, is not that, what you think, it is. It is more than a pump. It is, what you can see, the center of you. It is not that, what you think it is, just a pump which pumps blood. It helps you. It helps you all the time.

People of the world, do not think. Do not think, that you are other. Think, not. Do listen to your heart. It is, what you should listen too. You do not know this? Yes, many people have closed their hearts. Yes, this is possible, but it can be opened again.

People of the world, it is such. It is such, that the people, who are today telling us, what we should do, lost their mind. They are nomore able to control oneself and what they created. The system, which does so much harm to the world of people.

The EGO is good. It is good, as long as it is helpful to people. The people, who are dependent on their EGO or lost their mind, have no chance to go back. Their EGO does not allow this. They are driven by their EGO. It is their master.

Their EGO took them over. Their EGO has taken them away. Their EGO can take them away and never let them go again. They are completely dependent on their EGO. It is nothing anymore there, which can stop their EGO.

People of the world, you do not understand this. Don't worry, it is nothing, you should really understand. It is only something, which people can do, who are nomore there. Who lost their mind. Whose EGO is so big, that it can control them.

They played with money, and thus did not create anything with it. It was just a play. A play on the cost of the people. No!!! It was nothing. It was only a play, which was played, because they were so greedy. Greedy, to have always more money.

What is it, what can happen? Nothing can happen!!! It is such, that nothing can happen, because all the money, which is there, is not money. Money, which does something for the people. It is only money, they played with.

The peoples interest is not their interest. This is clear. They just want to have money. Money should do, what they want. Now it is such, that the money is nomore doing, what they want. It is out of control. Nobody can handle so much money.

People of the world, this crazy system is that, what they are still trying to keep going. It is nomore able to do, what is in the peoples interest. They just lie, when they are saying, it is still working. It does not work anymore.

This, people of the world is, what is the system. A crazy system, which is out of control. Nobody knows anymore, how much money is in the system. Nobody knows that, and also they do not know it anymore. They lie. They just issue money.

They are greedy. They do nothing else than looking for more money. The peoples money is not enough for them. They print also money themselves. They thus ruin more and more the whole system. They are so greedy, that nothing can stop them, if not the people.

People of the world are you aware of that, that all the systems they created would be lost, if you would say: "I do not want to pay in this system anymore." It would suddenly stop all, what they can do. They would be lost. They would be nomore there.

People of the world, are you aware of the fact, that it is your money, which they play with? Which they use for their purposes. Are you aware of that? Are aware of that, that they could do nothing anymore, if you would take your money and go?

People of the world, you are thinking, money is important. Yes, money is part of your life. It can help. It can do. It can be. It can be, what is good. Good is money, when it helps people. People to be. To do. To go. To go, and do, what they want.

The system of money. It is nothing. It was never anything. They did it in a way, which was completely different from that, what the system of money should be. It is nothing. It does not help people. It is nothing, and cannot be.

People of the world, this is, what is now. They are nomore there. They do, what they do. They cannot see anything anymore. All the murder, all the wars they initiated are out of control. Out of control is also their system. The system of money.

They are not, and cannot be anymore. They cannot see anymore. They do. They do only things, which they think. They think, and are thus nomore oneself. They think things, which you cannot think, people of the world. They have crossed every border.

People of the world, this is unbelievable, but it is, what it is. It is the end. It is the end of a human being. Human beings, who loose their mind, are out. They are nomore oneself. They cannot be anymore. They lost any humanity. They are not.

They lost their mind is something, which makes them nomore capable to see. They do not see anything anymore. They are nomore there and are only thinking. They think things, which are unbelievable. They can think anything. Thus they can do anything.

They are nomore there, means: "they lost everything, what a human being can loose." They are nomore there, means also: "they cannot control anything anymore in their thoughts. They lost their mind."

People of the world, are you aware of the fact, that those, who decide practically everything in this world, are ready to go further. Further with their thoughts about the people of the world. It is such, that they are nomore there.

People of the world, are you aware of the fact, that there is nothing left for you, when they decide, that this should be? Those, very few people, who already decide for hundreds of millions of people, that they should have nothing.

People of the world, are you aware of this? Are you aware, that you have the responsibility for your life? Do you see that? Do you see that, and are you willing to change something. Change something, which does not help you in your life.

It is thus, dear people of the world, that you are the one, who is deciding. It is your decision, what kind of life you will have. It is you, who decides about this. It is also you, who can decide, nomore to accept to live a life, like yours now.

Help you can rely on. This is All. This is it, what it is all about. You get help. Help, which you can rely on. This to understand is not so easy. You need trust. Trust in you. Trust in that, what is there. Your heart is there. Your heart can help.

It is not difficult, people of the world, when you know. What do you know? You know, what you can be. You know, what you can do. You know, what is there. You know, what can be. You know, that there is help. Help, which you can rely on.

To be aware, means: "you can do, what you want." It is not so difficult to understand this. It is only difficult, if you think. If you ask your heart, then it becomes easy. You will see. See what is. You will see, what is, because you will know.

There, people of the world, is important. To be there is important, because it is All. You are All, and this is, what it is all about. You can be. Are you aware of this? You are not aware of this. It is also difficult for you, to be aware of this.

People of the world, it is now. It is now, that you can decide. Decide to go. Go, and are. Go, and do. Go, and be. You can be All. You can love, and you can be All. All, what you want, and what you can do, with your talents. You are there.

People of the world, see. See, what love can do. You can love. You can love, and go. You can love, and be. You are. You are there. Those, who told you, what you have to do, are not there. They are lost. Lost in their thoughts. In nothing, what matters.

Love, that is All. All can be love. Love is there. It is there, and can help. Love can help, and love can change. Love can change, what only a very few people did. They did something, which has nothing to do with love. They lost their mind. They lost All.

Human beings love. They love, and then they can go. They love, and then they can do. They love, and then they can be. Be, what they are. Human beings, who can love. Love is All. Love can do All. Love can be All.

People of the world, this is no joke. It is no joke, means: "you can do this. You can do all of this, and end, what is not humanity." It is not, what human beings want. It is not, what human beings are. It is not, what human beings can be.

People of the world, we can end murder. We can end war. We can end an economy, which is no economy. We can end all of this, when we do, what is necessary. We stand together and say no. No!!! to All, what they want. This is necessary.

This means: "they are left with themselves." They are then nomore those, who can expect, that we do something, they want us to do. We say no. We say that, and they cannot do anything, to let us do again, what they want. It is our decision.

We are now there, people of the world. We are there, where we should be. We should be together, and stand together. We are there means also: "we can act. We can act jointly. We can act, and do, what we want." We want nothing anymore, what they want.

People of the world go. Go, and do, what is necessary. Your life is good. No! It is not good. You are steadily under pressure. You are nothing for them. What is that? That is nothing. You thus say: "when I am nothing, then I do nothing, what they want."

People of the world, be with you. Be with you, means: "You can go. Go and be." Be, like you are. You are a human being. You are full of that, what is important. You can love people. You love people and can cooperate with people.

It is easy, people of the world. You are buying, what they want. They just want this of you. Nothing else. Buy people, they say all the time. They create with this something, which is the only thing, they want. Moneystreams. Moneystreams. Moneystreams.

They are telling you nothing, but only one thing: "buy!" People of the world, just stop doing what they are telling you. Do not buy anymore. Buy, what you really need but stop buying more. Stop it, and thus tell them: "I am nomore doing what you want!!!"

What are they telling you, people of the world, every day, every minute, every second, when you listen to what they are telling you via their TV and Radio? Their newspapers. They are just telling you: "buy, and do, what you hear. Buy!!!"

It is your decision, people of the world, that you say no to all the action, which is taken by a very few people. That you say no, and do something. What can you do? You can say: "I am not anymore willing to do something they are telling me."

It is your decision, people of the world. It is your world, which is under pressure from a very few people. It is your decision, that you say no to what is happening. It is all your decision, people of the world.
You can decide.

Please people of the world, do something. Do something to stop this brutal way. There is no humanity. These people are just there, and do something, which only people can do, who lost something. Who lost their mind. Who lost anything, which is human.

Be you, means: "it is you, who can ask. Ask and do." Ask, why is this the way it is? Ask, why should I do this? Ask, why is this like it is? It is not my way!
It is not human. No humanity at all. Brutally against people.

This means: "you are there. You see. You can see. You are not hindered to see. You can do something, and you can stop what is happening." You do not believe this. Yes, it is difficult to believe. But: "be you. Be you, and do. Do, what you can do."

Dear people of the world, you can do something. You can do something means: "you cannot wait. You cannot wait and see. You cannot wait and do nothing. You cannot wait, and see and do nothing, because you are hurting yourself all the time."

Help can be. Help is also possible to get from God. No! Say those, who are there to speak with God. No! Say they, and say also, you have to ask me. No, is, what God would say. Just ask me for help. Just ask for help and see. See what happens and thank.

Help me, is something, which people can say. Why? Because they need from time to time help. Help, when they do not see something. When they are not with them. They can learn. They can not only learn, but also learn to ask for help.

To go means: "a human being is there to go." A human being has everything with him, which enables him, to go. Thus, nobody is needed to tell a human being all the time, what he can do. No! This is not necessary. It is help to go, what is good.

A human being is All means: "he can do All. All, what he has with him." He has a lot with him. With this he is able to live his life. Nobody above him. Nobody, who knows better than him, what he has to do. Human beings are selfstanding. They can go.

Human beings are All. Nothing is. Nothing is true, what they are told, that it is other. Human beings are All. All of them are human beings. Nobody is above them. Nobody is more. Nobody is more than a human being.

People are not other, when they are, what they are. They are only other, when their thinking takes them away from what they are. They are then nomore there. There means: "they can just nomore see." They do not see anymore, what they are. Human beings.

Thoughts are. They are part of the human beings, but they can also hinder people, to be. To be, and to do. To be, and to live a life, which is their life. They are lost. They lost themselves, because they started to think,
I am other.

To be is important. To be is All. To be, is All means: "people are." They are, what they are. They do, what they can do. They live their lives. They can be. They let themselves be. They are oneself. They are not driven by thoughts.

Special is nothing. Special cannot be. Special is not. It is not possible. It can only be, that people think, I am special. Then they start to do things, which they would never do, when they would still be what they are. Human beings, who are.

Now it is said. People are not special, because they are it. They only think, that they are special. This is the starting point of their illness. They think, and can not stop to think, that they are special. They thus do everything, to be special.

People of the world are other. Other than they, who believe, that they are special. No, they are also human beings. All, we are human beings. There is only one thing, which makes people other. It is their thinking. They think, I am other. I am special.

Special is nothing. People are not special. They are. They are and are human beings, who can do something with their talents. With what they know. With what they learned. To create. To be.
To be and to help others to be.

This illness is not so widespread. It is there with the people, who are the opinion, that they are something special. Not a human being, but something. Something is nothing. This can only think somebody, who regards himself special.

Illness is something, people do not understand properly. It has to do something with the thinking. Thinking makes people ill. They can be ill, and they can be so ill, that they do not see anymore anything. Anything, what they do.

Now they are not, what they are. They are the victims of the strategies of a very few people. People, who do not care about people. Who only use them. Nothing is for them important, other than their money. This illness does not help people.

People want to be, means: "they want to be human beings, who are happy." Happy, because they do, what they want. To share, what they do. To be together. To be with other people. To share time. To be other. Other means: "other than they are now."

It is nothing, what they regard important to do. It made people only loose their ways. The way of the people is other. They want to do something, which really matters. It matters, what helps people to be. To be, and to go. To be, and to do.

People are there. They start to see. They see, and are nomore able to follow. To follow those, who are there to make them believe, that life has to do something, what they regard important. No! It is not important, what they regard is important to do.

It cannot be, because it has nothing to do with human life. The human's life is other. They want to be oneself. They want to be other. Other means: "they want to be, what they are. Human beings, who live and do, what they want."

They must say it, because they cannot say anything other anymore. They do not live. They are prisoners of their thoughts. Thoughts, which they wanted all the people in the world to think. They have done a lot, that this happens. It cannot be.

Money, they tell you, who have all the money of the world, is the most important. It is not true. It is just true for them. For them, money is the only important thing. They thus believe in this. They believe in this, and cannot other. They must say it.

It is that, what creates the world, like it is. It is that, what the people let be, like they are not. They follow something, which is nothing. Nothing for them. They follow the money. The money, which does nothing for them.

People of the world, you can go, where you want. You can do, what you want. You are a human being. A human being can do, what he wants, but has to go. To go, and to do. To be, what he is. A human being, who is there. Who is not giving up, what he is.

Nothing is there. Nothing is there means: "you think, that you are not good. You are not good, and never good enough." This thinking keeps you going. Going, wherever the thinking let you go. It also can let you go not the way you want.

Money is nothing. It is nothing, when people think. They think, that they are somebody, when they have money. They are only, what they are, when they are, what they are. Human beings, who try to live a life, which matters. A life, which helps.

They fear, that they could loose their importance, when they are not rich enough. They fear, that they could loose what is the most important thing for them: "that, what matters to them. Money and importance, which they think, only gives money."

It is their life. A life, which does nothing. Nothing, because they do not use their talents. They only are brutally following one strategy. The strategy is: "we must become richer. Richer. Richer. Why? Because they fear.

They are lonely. They are lonely, because they do not have anything. They have bankaccounts. They have companies. No, they do not have them. They only have something, which does nothing for them, other than making money.

Money, which does not do anything.

Money makes the world go around, they say. No! This is a saying, which is not true. It is nothing, the money, they are talking about. They have it. They do something with it. Something is nothing, because it does not help anybody.

It is a nightmare, what they do. It is nothing. It is just making money. They never have enough. They collect money. They do nothing with it, but buy something. Nothing, which is really important for them. They only think, that it is important. What? Money.

This is their illness. Their illness is, that they do not see this. They only see their money. They do not really appreciate what they have. They have all - but nothing. Nothing, which really matters. Nothing what matters and does something for people.

Profits are nothing. Nothing, when they are only there, to increase something. Means: "to increase the money they have." Nothing is there, what is important. They gather money. Money. Money. Nothing, what can help anybody. Nothing what matters.

People of the world, it is simple. They have a simple strategy. Very simple. They can only think in this simplicity. They are focussed on this. They do not think: "what can I do, to make the world better." They only say: "what can we do, to make profits."

They profit. This means: "they are only focussed on profits." Nothing for the people. Only for profits. Profits give them something. Nothing what really matters, but a lot for them. A lot, because they think, that profits are the only thing, which matter.

This can go, when people know, that they are constantly manipulated by them. By those, who influence them. They do it via various strategies. Nothing of that, what they do, is good for the people. It is only done, because they want to profit.

Nothing is. Nothing is, when people think. They think, and are not that, what they are. They are like they are thinking. They become victims of those, who know, that people think, and they influence their thinking. They do it, and do it professionally.

This is the change. This is, what can help people. They think: "I am good, and are other." They start to think other. They start to behave other. They start to be, like they are. They are nomore the victims of those, who tell them: "you are not good."

I am good. This is the most important, what people should think. I am good. I am good. I am good. Nothing else they should again and again learn. Learn to think. Do not think about, why you are good. No! Just think: "I am good. This is all you should think."

People think. They think, what others did tell them, what they can think. This is not good. They should think on their own. They should learn. They should learn to think: "I am good. I am good enough. I can do. I will do, what I want. I am good."

People are there. This means: "they can do, what they want, when they believe in what they are." They are more, than they think. They think, and are not, what they are. They think, that they are not good. Good and also not good enough.

What can people do? People are there. They can do, what they have to do. They have to say: "we are not your people. We can do, what we want." We do not want, what you want. We are people. We want to do, what we want.

They are not aware, that this is coming. They do not believe. They do not believe in anything, except money. Money they think, can do all for them.

This is the mistake they make. Money can not do all for them.

Possible is now, that the people understand, that they did not do anything for them. People had to understand all of this, before they can do, what they do. They leave them alone with all their things. With things, which are not relevant.

It is over. Over is, that those, who are there with all their money, are able to convince people. They have done it for a long time. They did never help the people. They just took all their money, they have earned, to their benefit. This is nomore possible.

Something is not, what they think, who are constantly trying to tell people, what they should do. They are nomore relevant, the ones, which try to do this. They are just thinking. Thinking, that they still can manage to convince people.

What can they develop? Many things. They have a lot of talents, which allow them, to do something. Something, which can help them, to develop their talents. To learn. To go further. To be. To be, what they are. People, who can do something.

It is not, what they want to achieve with the money. They want the people to buy. To buy and become dependent. This is, what they want. This is nothing. People should take their money to do something, which helps them to develop something.

Money cannot do this. Money is not relevant. Money is something, which is only relevant, when it is for people. For people to help them to achieve something. This is relevant. People achieve something with the money. The money they spend.

What is relevant? Relevant is, that the people do not react anymore. No answer. No action. Nothing anymore, which could help them. They do not see. They just are there. There, and think. Think, that with their money they can still achieve something.

Nothing important means: "they are just speaking." They always did this, but now they have nothing anymore to say. Thus they are just speaking. More of the same, but it is nothing anymore, which is relevant. Nothing is relevant, what they say.

It is new, that they do, what they do. They are confused and thus nomore willing to wait. They are under pressure to show. To show, that they are there. They cannot be silent. They must steadily say something.
Nothing important.

People of the world, you can see. You are there to see. To see, and to go. Do not stay. Do not believe those, who say: "I am here. I can tell you. I can tell you, what you can do." Do not believe that. This is not, what you can do.

People of the world, do not give up. Your heart is there. It helps you, when you not give up to hear, what it tells you. It can tell you all. It is not there, just to pump blood in your system. It is there, to help you to see.

People of the world, you can see. You can see with your hearts. You have a heart. Do not let it go. Do not life like, you would not anymore have a heart. The heart is there. It can help you. It can help you to see. To see, and to go.

Love can never go. Love is. It is not something. It is no feeling. It is All. All, what is. All, what can be. All, what is important. All, what is not only important, but is life. Life can go. Love not. Love exists also then, when life is gone.

It is such, that they cannot believe, that love is something, which can do something for them. They cannot see. They only think. Their thinking is, what is their problem. What takes them all. All is love. They cannot love.
They are not there.

People of the world, it is nothing, what they can offer you, which matters for you. It is nothing, because they have no intention to make you happy. They just want to take everything from you. Everything and your life.

People are not things. People are important. Nothing else is important. People can do. People are that, what is never something. People matter. People are that, what all the people in the world should know. People are that, what God wants to be.

It is nomore possible, what we saw. We saw something, which cannot be something. Something, which really is important. We saw people suffering. We saw, how they were treated. They were treated not as human beings, but as things. Things were important.

It is now, that it can be. It can be, that people say no. No to all. No, to what they want. They cannot do anything, if people say no. If people say no, and are nomore willing to do, what they want. It is then gone, that they can tell them.

People in the world, do you think? No, do not think. Let your hearts decide. Let them decide, what you do. Nothing. Nothing is good. Nothing helps. Nothing can be. Nothing can be, when you stop doing. When you say no. No to them and that, what they want.

People in the world, are you aware, that something is changing. It is, what makes them nervous. It is clear, that they do not want to see, what happens now. The people are reluctant. Reluctant to do, what they want.

You go, people of the world. Do not believe them anything anymore, what they are telling you. Their lies are many. No lye is worth something. It is their way. It is their behaviour. It is, what they have done.

Must is something, which does not help people. It is something, which is only there, to force people to do something, which they do not want to do. Get rid of must, and you are free. This is, what people should think. All the time. I am free. I must not.

People cannot go, when they think. Then they must go all the time. Must is something, which is not there. Must is something, which was introduced by those, who told people something. They thought, that it would help them to be able to force people to do.

The people are there. It is their world. It is their earth. It is All. They have All with them. It is enough, what they have. They are not dependent. Dependent on people, who think. On people, who are trying to make profit with people. People cannot go.

They learn to go - the people. The people can go. They have everything with them. No people needed, who tell them all the time, what they have to do. The people learn to do, what is necessary. They have everything what they need with them.

There are no people who can tell other people their way, but they can be there. There, to listen. There, to help. Help, when people are ready to listen. To listen, and to take the help, to go one step further on their way. The way is there. They can learn.

It is now, that people cannot do anymore, what they do. They are not the people, they are. They go not the way, they can go. They are lost. No! They are never lost. They are lost, when they think, that there is no way for them. The way can be found.

People are happy, when they do, what they want. No life is possible, when people do not do, what they want. They are here to do something. No! They are here, to do something, they want to do. Nothing is, when people do not do, what they want.

It is now, that we are nomore able to be. To be in a world, which is like the world, we see. Nothing there, which makes life a pleasure. Only money. Only buying. Only products. Only nothing. Nothing, which helps the peoples to be. People, who are happy.

The EGO can be. The EGO is important. The EGO is. The EGO is something, which can help people. The EGO helps people, when they are in their hearts. When they still hear their heart speaking. When they are not lost in their thoughts. Then the EGO is good.

It is a nightmare, what they did to the peoples. They did it, to increase their wealth and power. This is nothing. Nothing, which can help people. It is only something, which is the EGO's playground. EGO is good. It is not good, when people loose their mind.

They want to do something, which is good. They do not want to do something, people tell them, what is good. The people who tell them, what is good, are not good. They are not good, because they think. They think nothing, which is good for the people.

Why is that now? It is now, because the people cannot live. The people cannot live their lifes. They cannot do, what they want. People are there to do, what they want. They are good. Good, and have everything with them, to do, what they want.

People are other. They can love. They love, and can see. They see, when they love. Love can do. Love can be. Love cannot go. Love is. Love is, and can be, and does not go. It is. That, what is, is All. The people are All. The people are that, what is All.

Why is this now? This is now, because it cannot be anymore, that these people reign the world. The world is not there, to let people like these people, who are nomore there, go. Go, and ruin the world. The world, people can see. They can see the earth.

They are in a prison. Their prison does not give them any chance anymore, to escape. It is all, what they recognize. They do not see anything. They just recognize, what their thoughts let them recognize. They are lost. Lost, and cannot be.

Why were they here? They were here, to show something. They showed us all, that people, who are nomore there, because they are lost in their thoughts, cannot do something anymore. They are in a prison, which is so big, that they cannot escape anymore.

When all their money would be nomore there, they would be lost. They are already lost. Why? Because they lost themselves. This is, what is true. They lost themselves, and therefore they do, what they do. Nothing, what can help them anymore.

Money is there. Money, which does not do anything. They just are playing with money. Money is nothing, when it does nothing for people. Let it go, the money they play with all the time. It is their way. A way, which is nothing. A way, which is no way.

It is their problem. They do not know. They cannot know, because they are nomore there. They think. They do. They are lost. They are not only lost, but do not see anything anymore. It is their problem. It is their money which make them believe, that they are.

Love is, what they cannot understand. They think it. They have something, which they call feelings. This is nothing, because it is only a product of their thoughts. Thoughts are nothing, when they do not do something for people. They cannot understand this.

It is nothing, what they do. They do something, which they do not understand. They believe, that they understand something, but they do not understand, what is there. They do not understand love, because they do not love. They think, and cannot love.

There are many news now coming up. They are all there to further confuse the people. We do not believe anymore in this. This can be said. It is over. You have issued to many lies all the time. Nobody believes you anymore what you say. Go, and let us alone.

Do, what you want, is something, which is necessary. Go, helpers, and do, what you want, but do not do anymore, what you do. Go helpers, it is nothing more to do for you. It is out. You can now do, what you want. You are nomore needed. It is out.

Helpers are those, who claim, that they help their people in the countries, in which they were eleceted to be something. It is out, what they can do. Nobody does believe anymore, what they are saying. Nobody is there anymore, to help them, when it is out.

Nothing is also nothing for all their helpers. They are there, and do nothing also. They just help a system, which they cannot avoid, that it is going. A system, which never did something for people. It was just there, but was worthless.

It is sunday. What are they doing? Nothing other, than every day. Nothing! They are just making money. They have enough, but it is never enough. Their mind is lost. They are confused. The money does nothing. Their friends are no friends. Nothing is there.

It is, like it is. They do not understand, what happens. They, who are the opinion, that they can rule the world. It is thus, because they are completely confused. Confused are people, who are out of their mind. They lost their mind.

It is new, that they are saying, what they want. It is new, that they are coming out of their homes and say: "we want you to be, like we want it." They say, what they want and are ready to do. It is their target, to make people do, what they want.

It is new, that they know, what they do. They do, what they believe. What they believe, is nothing. It does not work anymore. They issue money. They do everything, but nothing. It is worthless, what they do. They are lost. Lost in their thinking.

Do, what you want, is something, which is necessary. Go, helpers, and do, what you want, but do not do anymore, what you do. Go helpers, it is nothing more to do for you. It is out. You can now do, what you want. You are nomore needed. It is out.

Helpers are those, who claim, that they help their people in the countries, in which they were eleceted to be something. It is out, what they can do. Nobody does believe anymore, what they are saying. Nobody is there anymore, to help them, when it is out.

Nothing is also nothing for all their helpers. They are there, and do nothing also. They just help a system, which they cannot avoid, that it is going. A system, which never did something for people. It was just there, but was worthless.

It is sunday. What are they doing? Nothing other, than every day. Nothing! They are just making money. They have enough, but it is never enough. Their mind is lost. They are confused. The money does nothing. Their friends are no friends. Nothing is there.

It is new, that they know, what they do. They do, what they believe. What they believe, is nothing. It does not work anymore. They issue money. They do everything, but nothing. It is worthless, what they do. They are lost. Lost in their thinking.

New is, that there is something changing. What? That we can see. It is something, which is important for people. People are nomore willing to accept all. They stop doing things, which are no good for them. Let's see, what happens.

It is obvious, what happens. We will be surprised, when all the things, which are there, become more and more obvious. Obvious means: "the light will be there and show all of us, what is going on. A great game, which is nothing worth for the people."

It is nothing new, that many people live on the account of other people. It is only not obvious enough, that only a very few people in the world own practially everything of substance. What happens here, is the question?

What is new, you are asking. Nothing is new, I tell you. It is a long time, since we are looking on something, which we should have never allowed to happen to us. It is the presence of people, who are not good. Not good and want the world to be, like they are.
